in all areas of mobility today engineers are asked to prove that their product will function as expected while hitting cost and weight targets however sustainability is rarely a consideration when making component selection decisions with that the understanding of the definition of sustainability or awareness of metrics such as the carbon footprint of wiring products is less than 5 this is happening at the same time as companies are increasingly announcing ambitious goals for net zero emissions or touting their progress in this field the gap between these ambitions and the

engineers making the decisions is rooted as an issue in data sustainability for wiring in mobility carbon footprint calculation standards and reporting discusses how engineers are under pressure to develop products on tight schedules meeting function quality cost and weight requirements without a standard for carbon footprint calculation a single source of truth for each product s footprint or a company distributing this accurate number widely 9781468609578 9781468609585 doi org 10 4271 epr2025010
