although david riesman wrote over half a century ago his concept of autonomy as
presented in the lonely crowd 1950 speaks directly to the intellectual and
emotional disarrangements of the twenty first century the current malaise

produced by the excesses of commodity culture information technology the hyperreal and fake news militate against our ability to think critically about contemporary society and while postmodern authors insist that this bewildering situation weakens and assails our critical thinking skills riesman s notion of autonomy refuses to capitulate to such a somber interpretation rather he is convinced that individuals have the intellectual and emotional mettle to think for themselves and not be drawn into the demands of a commercialized culture and a commodity driven lifestyle as we pick and choose the terms of our engagement we can remain aloof from society s engulfing influence and preserve the oppositional thinking needed for democracy to illustrate this point most clearly this book puts riesman into conversation with the writings of theodor adorno whose evaluation of the critical faculty s ability to withstand the culture industry is famously pessimistic

intended for introductory classes focusing on philosophy of mind theories of mind includes readings from primary sources edited to suit the needs of the beginner edited selections focus on vivid examples and counter examples and meet the needs of instructors concerned with assigning accessible primary source material that can serve as a foundation for more advanced studies in philosophy
