this volume addresses the need to integrate gender equality into business and management education and provides examples of leading initiatives illustrating how this can occur from various disciplinary and global perspectives gender inequality has a long history in business schools and the workplace and traditions are hard to change some disciplines remain resolutely gendered affecting both women and men and case materials on women leaders and managers are still rare the chapters provide conceptual and research rationales as to why responsible management education must address the issue of gender equality they also identify materials and resources to assist faculty in integrating gender issues and awareness into various disciplines and fields these include specific case studies and innovations that assess or address the role of gender in various

educational environments the book is designed to help faculty integrate the topic of gender equality into their own teaching and research and gain support for the legitimacy of gender equality as an essential management education topic this is the first book in a series on gender equality as a challenge for business and management education published with the principles of responsible management education prime working group on gender equality

egypt s history has been marked by a host of dynasties empires regimes and governments and it remains a leading regional power today since 2011 a state of transition has become a more or less permanent feature of egypt s political scene however the political situation seemed to have stabilised in late 2014 particularly after abdel fattah el sisi was sworn in as president a parliamentary election is expected in the first half of 2015 under the new constitution

this book focuses on the ecological impacts of the great east japan earthquake and resulting tsunamis a rare and extremely large disturbance event on various coastal ecosystems in japan s tohoku area including sub tidal and tidal animal communities sand dune plant communities and coastal forests the studies presented here describe not only how species and populations in these ecosystems were disturbed by the earthquake and tsunamis but also how the communities have responded to the event and what types of anthropogenic activities will hamper their recovery processes in the ecological sciences it is often argued that large disturbances are critical to shaping community structures and biodiversity in local and regional habitats however our understanding of these roles remains limited simply because there have been few opportunities to examine and address the ecological impacts of large disturbance events the scale of the 2011 great east japan earthquake makes it one of the largest hazards in the past 1000 years thus this book provides a unique opportunity to advance our understanding of the ecological impacts of large and rare disturbances and the implications of these events in the conservation and management of coastal ecosystems following an outline of the great east japan earthquake the book s content is divided into two major parts part i reports on studies examining the ecological impacts of the tsunamis on sub tidal and tidal animal communities while part ii focuses on terrestrial plant communities in japan s coastal tohoku area this book will benefit all scientists interested in the ecological impacts of large disturbances on aquatic and terrestrial ecosystems in general and especially those who are interested in the ecological management of coastal ecosystems and ecosystem based disaster risk reduction ecodrr
