michael s brady presents a fresh perspective on how to understand the difference that emotions can make to our lives it is a commonplace that emotions can give us information about the world we are told for instance that sometimes it is a good idea to listen to our heart when trying to figure out what to believe in particular many people think that emotions can give us information about value fear can inform us about danger guilt about moral wrongs pride about achievement but how are we to understand the positive contribution that emotions can make to our beliefs in general and to our beliefs about value in particular and what are the conditions in which emotions make such a contribution emotional insight aims to answer these questions in doing so it illuminates a central tenet of common sense thinking contributes to an on going debate in the philosophy of emotion and illustrates something important about the nature of emotion itself for a central claim of the book is that we should reject the idea that emotional experiences give us information in the same way that perceptual experiences

do the book rejects in other words the perceptual model of emotion instead the epistemological story that the book tells will be grounded in a novel and distinctive account of what emotions are and what emotions do on this account emotions help to serve our epistemic needs by capturing our attention and by facilitating a reassessment or reappraisal of the evaluative information that emotions themselves provide as a result emotions can promote understanding of and insight into ourselves and our evaluative landscape
