assessment for social justice takes the established idea of assessment for learning and extends it to
consider how assessment contributes to social justice within and through higher education jan
mcarthur invites the reader to rethink familiar positions on assessment and fairness and seeks to
explore the full complexity of a critical theory inspired notion of social justice she positions her
work in contrast to more procedural approaches to social justice such as john rawls s influential
theorisation of social justice in contrast mcarthur draws on the work of third generation critical
theorist axel honneth and takes inspiration from honneth s three realms of mutual recognition in
order to reconsider the nature of assessment relationships and practices a further theoretical strand

is introduced in the form of social practice theory and particularly the work of theodore shatzki mcarthur provides a theoretically rigorous understanding of assessment as a social practice and as a vehicle both for and against social justice together with critical theory this work enables a realizable vision of an alternative approach to assessment in higher education where the underlying aim is greater social justice mcarthur argues that students must be nurtured to recognise the social contribution that they can make as a result of engaging with knowledge in higher education rather than defining their achievements in terms of a mark grade or degree classification

technological developments in education and automation includes set of rigorously reviewed world class manuscripts dealing with the increasing role of technology in daily lives including education and industrial automation technological developments in education and automation contains papers presented at the international conference on industrial electronics technology automation and the international conference on engineering education instructional technology assessment and e learning which were part of the international joint conferences on computer information and systems sciences and engineering

learning strategies for critical thinking are a vital part of today s curriculum as students have few additional opportunities to learn these skills outside of school environments therefore it is essential that educators be given practical strategies for improving their critical thinking skills as well as methods to effectively provide critical thinking skills to their students the research anthology on developing critical thinking skills in students is a vital reference source that helps to shift and advance the debate on how critical thinking should be taught and offers insights into the significance of critical thinking and its effective integration as a cornerstone of the educational system highlighting a range of topics such as discourse analysis skill assessment and measurement and critical analysis techniques this multi volume book is ideally designed for teachers instructors instructional designers curriculum developers education professionals administrators policymakers researchers and academicians

like previous volumes in the educational innovation in economics and business series this one is genuinely international in terms of its coverage with contributions from ten different countries and four continents it reflects the worldwide interest in and commitment to innovation in business education with a view to enhancing the learning experience of both undergraduates and postgraduates it should prove of value to anyone engaged directly in business education defined broadly to embrace management finance economics informational studies and ethics or who has responsibility for fostering the professional development of business educators the contributions have been selected with the objective of encouraging and inspiring others as well as illustrating developments in the sphere of business education

when facilitating high quality education using digital technology to personalize students learning is a focus in the development of instruction there is a need to unify the multifaceted directions in personalized learning by presenting a coherent and organized vision in the design of personalized

learning using digital technology digital technologies and instructional design for personalized learning is a critical scholarly resource that highlights the theories principles and learning strategies in personalized learning with digital technology featuring coverage on a broad range of topics such as collaborative learning instructional design and computer supported collaborative learning this book is geared towards educators professionals school administrators academicians researchers and students seeking current research on the area of personalized learning with digital technology

a framework for an integrated problem solving and program development environment that addresses the needs of students learning programming is proposed several objectives have been accomplished defining the tasks required for program development and a literature review to determine the actual difficulties involved in learning those tasks a comprehensive study of environments and tools developed to support the learning of problem solving and programming was then performed covering programming environments debugging aids intelligent tutoring systems and intelligent programming environments this was followed by a careful analysis and critique of these systems which uncovered the limitations that have prevented them from accomplishing their goals next an extensive study of problem solving methodologies developed in this century was carried out and a common model for problem solving was produced the tasks of program development were then integrated with the common model for problem solving then the cognitive activities required for problem solving and program development were identified and also integrated with the common model to form a dual common model for problem solving and program development this dual common model was then used to define the functional specifications for a problem solving and program development environment which was designed implemented tested and integrated into the curriculum the development of the new environment for learning problem solving and programming was followed by the planning of a cognitively oriented assessment method and the development of related instruments to evaluate the process and the product of problem solving a detailed statistical experiment to study the effect of this environment on students problem solving and program development skills including system testing by protocol analysis and performance evaluation of students based on research hypotheses and questions was also designed implemented and the result reported
