rüdiger bittner argues that the aim of thinking about what to do of practical reason is to find not what we ought to do but what it is good to do under the  
 circumstances neither under prudence nor under morality are there things we ought to do there is no warrant for the idea of our being required by  
 natural law or by our rationality to do either what helps us attain our ends or what is right for moral reasons while common moral understanding is  
 committed to there being things we ought to do and to our being guilty and deserving blame if we fail to do them we can lay aside these notions without  
 loss indeed with benefit the volume also explains what it is for something to be good to do under the circumstances and argues for understanding  
 practical reason in these terms what is good to do we find by experience what we go through teaches us what helps and what hinders and helps us figure  
 out what is prudentially useful and what is morally right to do although ultimately this difference itself gives way and morality turns out to be a part of  
 prudence

the public outcry for a return to moral education in our schools has raised more dust than it dispelled building upon his provocative ideas in becoming responsible michael pritchard clears the air with a sensible plan for promoting our children's moral education through the teaching of reasonableness pritchard contends that children have a definite but frequently untapped capacity for reasonableness and that schools in a democratic society must make the nurturing of that capacity one of their primary aims as fundamental to learning as the development of reading writing and math skills reasonableness itself he shows can be best cultivated through the practice of philosophical inquiry within a classroom community in such an environment children learn to work together to listen to one another to build on one another's ideas to probe assumptions and different perspectives and ultimately to think for themselves advocating approaches to moral education that avoid mindless indoctrination and timid relativism pritchard neither preaches nor hides behind abstractions he makes liberal use of actual classroom dialogues to illustrate children's remarkable capacity to engage in reasonable conversation about moral concepts involving fairness cheating loyalty truth-telling lying making and keeping promises obedience character and responsibility he also links such discussions to fundamental concerns over law and moral authority the roles of teachers and parents and the relationship between church and state pritchard draws broadly and deeply from the fields of philosophy and psychology as well as from his own extensive personal experience working with children and teachers the result is a rich and insightful work that provides real hope for the future of our children and their moral education
