disputes in the energy and natural resources sector are at the heart of international  
arbitration with more arbitrations arising in the international energy sector than in any  
other sector it is not surprising that the highest valued awards in the history of  
arbitration come from energy related arbitrations energy disputes often involve

complex and controversial issues relating to security sovereignty and public welfare international arbitration in the energy sector puts international energy disputes into a global context providing broad coverage of different forms and systems of dispute resolution across both renewable and non renewable sectors with contributions from leading arbitrators academics and industry experts from across the globe the twenty chapters in the book enable readers to compare the approaches to and learnings from energy arbitrations across various legal systems and geographic regions after outlining the international energy arbitration legal framework in part i the text delves into a detailed analysis of the problems which regularly arise in practice these include among other things commercial disputes in part ii e g over the upstream oil sector and long term gas supply contracts investor state disputes in part iii e g under the energy charter treaty and public international law disputes in part iv e g concerning international boundaries and the distribution of natural resources alongside recent developments in the international energy sector attention is given to climate and sustainable development disputes which raise important questions about enforcing sustainability objectives on individuals corporations and states backed by analyses of arbitral awards national court and international tribunal decisions treaties and other international legal instruments as well as current events and news in the energy industry this text offers a unique contribution to international energy literature and provides insightful commentary on the prevalent issues in the field it is essential reading for any practitioner or researcher in the energy and natural resources sector

in the last decade there has been a growing interest in the study of the interactions between the heart and the brain especially in the field of cerebral ischemia the interactions between cardiovascular and cerebrovascular diseases are of relevance not only for research investigation but also for clinical implications in the daily clinical practice i e a wealth of information has been gathered particularly on three topics cardiovascular consequences of cerebral injuries cardioembolic stroke and association of carotid and coronary artery disease the available information however is still sparse and fragmentary mainly because of the lack of communication between neurologists

and cardiologists with the aim of improving communication between several disciplines and technologies we started to organize since 1987 in bologna italy an international symposium on heart brain interactions to be held every 3 years our intention was to gather prominent clinicians and researchers from outstanding cardiologic and neuro logic institutions actively involved in the study of heart brain interactions the ambitious goal has been to fit different pieces of information like in a puzzle this book originates from the contributions presented at the 2nd symposium which was held in bologna on november 30 december 1 1990 the book is subdivided into three sections i cardiovascular consequences of cerebral damage ii cardiogenic cerebral ischemia iii cerebrovascular and coronary artery disease
