in 2009 and 2010 the european court of justice and the european court of human rights underwent significant reforms to their respective judicial appointments processes though very different judicial institutions they adopted very similar and rather remarkable reforms each would now make use of an expert panel of judicial notables to vet the candidates proposed to sit in luxembourg or strasbourg once established these two vetting panels then followed with actions no less extraordinary they each immediately took to rejecting a sizable percentage of the judicial candidates proposed by the member state governments what had happened why would the member states of the european union and of the council of europe which had established judicial appointments processes that all but ensured themselves the unfettered power to designate their preferred judges to the european courts and who had zealously maintained and exercised that power over the course of some fifty years suddenly decide to undermine their own capacity to continue to do so this book sets out to solve this mystery its point of departure is that it would be a mistake to view the 2009 2010 establishment of the two vetting panels in isolation from other european judicial developments though these acts of institutional creation are certainly the most notable recent developments they actually represent but the crowning achievement of a process of european judicial appointments reform that has

been running unremittingly since the 1990s this longstanding and tenacious movement has actually triggered a broad set of interrelated debates and reforms encompassing not only judicial appointments per se but also a much wider set of issues including judicial independence judicial quality judicial councils the separation of powers judicial gender equity and more

this book seeks to understand how women judges are situated as legal knowers on the high court of australia by asking whether a near equal gender balance on the high court has disrupted the court's historically masculinist gender regime this book examines how the high court's gender regime operates once there is more than one woman on the bench it explores the following questions how have the court's gender relations accommodated the presence women on the bench how have the women themselves accommodated those pre-existing gender relations how might legal judgments and reasoning change as a result of changing gender dynamics on the bench to develop answers to these and other questions the book pursues a methodology that conceptualises the high court as an institution with a particular gender regime shaped historically by the dominant gender order of the wider society the intersection between the gendered individuals and the gendered institution in which they operate produces and reproduces that institution's gender regime hence the enquiry is not so much asking have women judges made a difference but rather is asking how should we understand women judges relationship with the law a relationship that is shaped as much by the individual judge as by the institutional context in which they operate scholars legal practitioners and researchers interested in judicial reasoning gender diversity and the legal profession gender and politics will be interested in this book because it breaks new ground as a case study of a court's gender regime at a particular time
