a debate style reader designed to introduce students to controversies in educational psychology the readings which represent the arguments of leading educators and social commentators reflect a variety of viewpoints and have been selected for their liveliness and substance and because of their value in a debate framework it actively develops students critical thinking skills

exploring the worlds inside and outside the school this work looks at second language acquisition theory and examines social and cultural factors that affect the school performance of language minority students classroom examples put the theory into practice and promote cultural sensitivity

meeting the challenge to transform one's math teaching is a daunting prospect most teachers are aware of the need for change and know which individual aspects of their programs they would like to reform if only they could make the needed changes in some easy safe way however by its very nature the transformation of a learning program is neither simple nor without risk in putting it together gary tsuruda discusses how his personal belief system about learning underwent a significant transition and describes in detail how he put the results of this transition to use in a middle school mathematics classroom where real mathematical thinking became the driving force the author describes the bits of evidence which over the years made it apparent to him that traditional methods were not working the book includes sections on the use of essays journals and other forms of writing in the math classroom as well as assessment alternatives such as portfolios in the problem solving chapter the author writes about his use of problems of the week and problems of the day in the classroom which encourage students to solve nonroutine

problems on a regular basis and have fun doing so putting it together is for every middle school teacher looking for help and guidance in meeting the objectives of the nctm standards
