the volume of traffic that they are now experiencing for instance shoulders have been known to collapse when a tour bus has moved too far over to one side of a narrow road in order to make way for an oncoming vehicle thankfully there have been no serious injuries to people under such circumstances but there have been enough scares to make people stand up and pay attention a related problem that has been growing ever more serious is the limited experience of many folks when it comes to the driving conditions endemic to iceland i am speaking of driving in strong winds winter driving two lane highways gravel roads and so on so the road system definitely needs a major overhaul however that is not an undertaking that can be completed overnight and besides it is entirely open to debate whether we want all those roads improved more on that later for now at least we must accept the sort of road system we have and try our best to make our visitors aware of the main dangers and risks of motoring in iceland so that we can all stay safe
