the spitfire mk IX is one of the best known versions of the spitfire however it should never really have existed its creation can be attributed to the appearance of the focke wulf fw190 over western europe at the end of 1941 royal air force pilots were quick to state the spitfire mk V the frontline raf fighter at the time in great britain was outclassed in many aspects by the new german fighter the raf therefore had to urgently find a

solution to improve the spitfire and with a new merlin engine the spitfire mk ix was born the mk ix was produced for almost three years and would become one of the main fighters and fighter bombers of the raf in europe in 1944 and 1945 in total during the second world war more than 100 fighter units were totally or partially equipped with the spitfire included the two belgian fighter squadrons of the raf nos 349 and 350 and the only dutch fighter squadron no 322 these three squadrons are here covered in 36 pages close to 40 photos and five colour profiles

the spitfire xiv was the logical development of the spitfire mk xii see squadrons 5 the mk xiv differed from the mk xii in that the longer two stage supercharged griffon 65 was mounted further forward a new five bladed rotol propeller was used and was the most obvious visual difference compared to earlier marks the first batch of aircraft to fly with the griffon 60 series engines were six converted mk viiis the first one of these was flown on 20 january 1943 with production ordered following a series of trials the first aircraft left the production line in october 1943 following the amendment of existing spitfire contracts the xiv was initially seen as an interim design pending the spitfire mk xviii s availability delays with the xviii meant the xiv became one of the major spitfire fighter variants and a valuable asset for the raf during the final year of the war the xiv was built as a fighter but was also developed for fighter reconnaissance fr to replace the effective but ageing mustang in the tac r role the mark remained in service with the raf and various foreign air forces including belgium well after the war during the war only a limited number of squadrons were re equipped with the type and among them one belgian squadron 350 and one dutch squadron 322 this book covers the operational usage of the spitfire xiv by those two units which were engaged against the v 1 and with the 2 taf this book is illustrated with about 35 photos and five colour profiles

once production of the spitfire mk i was underway an improved version was looked at based around the 1175hp merlin xii the spitfire mk ii or supermarine 329 as its constructor named it was born great hopes were placed in this new version as an order for 1000 aircraft was placed on 12 april 1939 before the mark s first flight for serials p7280 p8799 this production run was launched at castle bromwich in birmingham the new supermarine production line the first aircraft were delivered in june 1940 and the spitfire mk ii included all improvements and refine ments added to the spitfire mk i deliveries continued up to july 1941 the mk ii entered service in the midst of the battle of britain first with 66 squadron and progressively the spitfire mk ii became standard equipment across fighter command with no less than 56 squadrons known to have been equipped fully or partially with the mark peak usage was reached during the summer of 1941 but from the autumn of that year it began to be withdrawn from first line units in favour of the mk v among the squadrons equipped with the spitfire mk ii there were the squadrons manned by men coming from southern rhodesia canada australia new zealand and from

the usa with the famous eagle squadrons illustrated with 30 photographs and six colour profiles

the squadrons series details in each title the operational usage of an aircraft version used by the raf squadron per squadron with plenty of first hand photos and unpublished material the spitfire mk vi was probably the less known variant of the spitfire and was not really appreciated by the pilots however this study tends to prove that the mk vi was not as that bad as we can think

the full history of this first griffon engined spitfire variant is told in 44 pages with the list of all the claims the losses and other appendices the success of this variant was satisfactory enough to open a new chapter of the griffon engined marks
