this book documents the first world landslide forum which was jointly organized by the international consortium on landslides including eight organizations: UNESCO, WMO, FAO, UNISDR, UNU, UNEP, World Bank, UNDP, and four NGOs: International Council for Science, World Federation of Engineering Organizations, Kyoto Univ, and Japan Landslide Society. In Tokyo in 2008, the material consists of four parts: the open forum, progress of IPL activities, four thematic lectures in the plenary symposium, global landslide risk reduction, six keynote lectures in the plenary session, and the aims and overviews of eighteen parallel sessions dealing with various aspects necessary for landslide disaster risk reduction, such as observations from space, climate change, and slope instability, landslides threatening heritage sites, the economic and social impact of landslides, monitoring, prediction, and early warning, and risk management strategies in urban areas, etc. Thus, it enables the reader to benefit from a wide range of research intended to reduce risk due to landslide disasters as presented in the first global multi-disciplinary meeting.

In this book, which was originally published in 2005, Amanda Lillie challenges the urban bias in Renaissance art and architectural history by investigating the architecture and patronage strategies, particularly those of the Strozzi and the Sassetti clans in the Florentine countryside during the fifteenth century, based entirely on archival material that remained unpublished at the time of publication. Her book examines a number of villas from this period and reconstructs the value systems that emerge from these sources, which defy the traditional idealized interpretation of the Renaissance villa. Here, the house is studied in relation to the families who lived in them and to the land that surrounded them. The villa emerges as a functional, utilitarian farming unit upon whose success families depended and where dynastic and patrimonial values could be nurtured.

Federico Barocci was among the most admired painters in sixteenth-century Italy, but the distinctive nature of his compelling altarpieces and their historical importance have never been fully understood. This important study relates Barocci's achievements to transformations in the theory and practice of painting during an era in which pictorial developments generated deep tensions for ecclesiastical art. Barocci was celebrated as one of the only painters whose religious works combined the sensuous allure increasingly desired in modern art with profound devotion. Through a close study of Barocci's work and of documents ranging from letters to art theory, Stuart Lingo reconstructs how the painter accomplished his artistic and cultural miracle. In so doing, he offers new insights into critical artistic issues in the late Renaissance, from the cultural significance of stylistic choices to the early development of analogies between painting and music as affective arts.
