in this book which was originally published in 2005 amanda lillie challenges the urban bias in renaissance art and architectural history by investigating the architecture and patronage strategies particularly those of the strozzi and the sassetti clans in the florentine countryside during the fifteenth century based entirely on archival material that remained unpublished at the time of publication her book examines a number of villas from this period and reconstructs the value systems that emerge from these sources which defy the traditional idealized interpretation of the renaissance villa here the house is studied in relation to the families who lived in them and to the land that surrounded them the villa emerges as a functional utilitarian farming unit upon whose success families depended and where dynastic and patrimonial values could be nurtured

federico barocci was among the most admired painters in sixteenth century italy but the distinctive nature of his compelling altarpieces and their historical importance have never been fully understood this important study relates barocci's achievements to transformations in the theory and practice of painting during an era in which pictorial developments generated deep tensions for ecclesiastical art barocci was celebrated as one of the only painters whose religious works combined the sensuous allure increasingly desired in modern art with profound devotion through a close study of barocci's work and of documents ranging from letters to art theory stuart lingo reconstructs how the painter accomplished his artistic and cultural miracle in so doing he offers new insights into critical artistic issues in the late renaissance from the cultural significance of stylistic choices to the early development of analogies between painting and music as affective arts
