unified reality theory demonstrates that the source of reality is a universal consciousness and that we are in no way separable from that source and so in no way truly separable from each other or any other aspect of reality i recommend this book to anyone interested in understanding the nature of reality and their place in it deepak chopra unified reality theory describes how all reality evolves from an absolute existence it also demonstrates that this absolute existence must have consciousness as an attribute that is intrinsic to its being thus unified reality theory shows that consciousness rather than being a product of the evolution of physical reality is itself the source of what we experience as physical reality and that physical reality is itself but one aspect of an evolving universal consciousness unified reality theory shows that most fundamentally this absolute consciousness existence evolves into reality by means of a single process self relation that is consciousness existence becomes reality by forming relationships with itself analogous in a very limited way to what happens to a rubber band that is twisted upon itself i.e. it remains whole while differentiating into other forms thus unified reality theory demonstrates that reality is a state of existential self relation the idea that the universe consists of existence which has formed relationships with itself isn't new taoists have understood this idea for at least a couple of thousand years what is new here is the presentation of this idea in the form of a detailed and defined structural model that correlates with the behavior of physical reality as described by science in general and physics in particular ultimately unified reality theory uses science and logic to make the case that god exists as a pervasive and absolute consciousness that transcends the realities of space and time and that we as well as everything else are that
