port describes both the nature and process of protecting appellations of source in japan and provides
normative commentary on this protection by focusing on the japanese judiciary s interpretation of
two statutes the trademark law and the unfair competition prevention act some important lessons are
learned first the japanese judiciary treats trademark owners both foreign and domestic paternalistically
japanese courts go to great extremes to avoid harsh results that seem possible under a strict reading of
these two statutes second japanese trademark owners are extremely rights conscious and pursue
litigation to the fullest in order to drive up the cost of market access by competitors third the japanese
trademark right operates more like a true property right than it does in america this has broad
ramifications as judges treat the right with far more deference than their american counterparts

finally this book shows the very broad scope of trademark protection in japan

a research bulletin examining the japanese automotive industry s impact worldwide
