twenty years after its discovery recombinant human leptin has been approved by the food and drug administration for the treatment of patients with lipodystrophy beginning with a synthesis of the vast body of work on its discovery dissection of mechanisms and effects in experimental models the focus of this book shifts to a consideration of the regulation and role of leptin in humans the emphasis on human level data is a unique feature of this book the results of numerous studies indicate that leptin is indeed a regulated human hormone leptin provides a detailed account of the myriad physiological hormonal metabolic immunological mitogenic and inflammatory modulators and targets of leptin in a single volume next follows a comprehensive presentation of the therapeutic trials of recombinant leptin in patients with congenital leptin deficiency lipodystrophy hypothalamic amenorrhea and other emerging areas including leptin supplementation in leptin replete subjects leptin substitution for insulin in diabetic models and novel combination regimens of leptin and other biogenic peptides unanswered questions and future directions in leptin research are highlighted in the foreword by dr jeffrey friedman and throughout the volume identifying such questions helps direct research that could deepen understanding of the complex regulation of leptin under physiological and pathological conditions a critical prerequisite to its rational deployment in the treatment of human disorders

stuart walker s design work has been described as life changing inspiring disturbing and ferocious drawing on an extraordinarily diverse range of sources and informed by creative practice design for life penetrates to the heart of modern culture and the malaise that underlies today s moral and environmental crises the author argues that this

malaise is deep seated and fundamental to the modern outlook he shows how our preoccupation with technological progress growth and the future has produced a constricted view of life one that is both destructive and self reinforcing based on over twenty five years of scholarship and creative practice he demonstrates the vital importance of solitude contemplation inner growth and the present moment in developing a different course one that looks squarely at our current precarious situation while offering a positive hopeful way forward a way that is compassionate context based human scale ethically motivated and critically creative design for life is an intensely original contribution that will be essential reading for design practitioners and students written in a clear accessible style it will also appeal to a broader readership especially anyone who is concerned with contemporary society's rising inequalities and environmental failings and is looking for a more constructive balanced and thoughtful direction

human aging from cellular mechanisms to therapeutic strategies offers an exhaustive picture of all the biological aspects of human aging by describing the key mechanisms associated with human aging and covering events that could disrupt the normal course of aging each chapter includes a summary of the salient points covered along with futures prospects the book provides readers with the information they need to gain or deepen the skills needed to evaluate the mechanisms of aging and age related diseases and to monitor the effectiveness of therapies aimed at slowing aging the book encourages phd and postdoc students researchers health professionals and others interested in the biology of aging to explore the fascinating and challenging questions about why and how we age as well as what can and cannot be done about it concentrates on different processes e g oxidative stress cellular senescence and inflammaging offers the ability to access cross sectional knowledge more easily written by expert researchers in biogerontology who are actively involved in various fields within aging research
