the handbook of air pollution prevention and control provides a concise overview of the latest  
 technologies for managing industrial air pollution in petrochemical oil and gas and allied  
 industries detailed material on equipment selection sizing and troubleshooting operations is  
 provided along with practical design methodology unique to this volume are discussions and  
 information on energy efficient technologies and approaches to implementing environmental cost  
 accounting measures included in the text are sidebar discussions questions for thinking and  
 discussing recommended resources for the reader including sites and a comprehensive glossary the  
 handbook of air pollution prevention and control also includes free access to us epa s air  
 dispersion model screen3 detailed examples on the application of this important software to  
 analyzing air dispersion from industrial processes and point sources are provided in the handbook  
 along with approaches to applying this important tool in developing approaches to pollution  
 prevention and in selecting control technologies by applying screen3 along with the examples

given in the handbook the user can evaluate the impact of processes and operations to air quality and apply the model to assess emergency scenarios to help in planning to develop environmental impact assessments to select pollution control technologies and to develop strategies for pollution prevention two companion books by cheremisinoff are available handbook of water and wastewater treatment technologies and handbook of solid waste management and waste minimization technologies uniquely combines prevention and control concepts while covering the practices and technologies that are applied to the prevention of air pollution in the chemicals manufacturing oil and gas iron and steel and pharmaceutical industries and to the cleaning and control of industrial air emissions provides a bridge for today s environmental manager by focusing on an integrated approach to managing air pollution problems within industrial operations shows you how to calculate financial returns from pollution prevention projects
