this book examines ghana s pan african foreign policy during nkrumah s rule investigating how ghanaians sought to influence the ideologies of african liberation movements through the bureau of african affairs the african affairs centre and the kwame nkrumah ideological institute in a world of competing ideologies when african nationalism was taking shape through trial and error nkrumah

offered nkrumaism as a truly african answer to colonialism neo colonialism and the rapacity of the cold war powers although virtually no liberation movement followed the precepts of nkrumaism to the letter many adapted the principles and organizational methods learnt in ghana to their own struggles drawing upon a significant set of primary sources and on oral testimonies from ghanaian civil servants politicians and diplomats as well as african freedom fighters this book offers new angles for understanding the history of the cold war national liberation and nation building in africa

as wars of liberation in africa and asia shook the post war world a cohort of activists from east and central africa specifically the region encompassing present day malawi zambia uganda and mainland tanzania asked what role they could play in the global anticolonial landscape through the perspective of these activists ismay milford presents a social and intellectual history of decolonisation and anticolonialism in the 1950s and 1960s drawing on multi archival research she brings together their trajectories for the first time reconstructing the anticolonial culture that underpinned their journeys to delhi cairo london accra and beyond forming committees and publishing pamphlets these activists worked with pan african and afro asian solidarity projects cold war student internationals spiritual internationalists and diverse pressure groups milford argues that a focus on their everyday labour and knowledge production highlights certain limits of transnational and international activism opening up a critical albeit less heroic perspective on the global history of anticolonial work and thought

gamma delta $\gamma\delta$ t cells are a small subset of t lymphocytes in the peripheral circulation but constitute a major t cell population at other anatomical localizations such as the epithelial tissues in contrast to conventional $\alpha\beta$ t cells the available number of germline genes coding for t cell receptor tcr variable elements of $\gamma\delta$ t cells is very small moreover there is a preferential localization of $\gamma\delta$ t cells expressing given vgamma and vdelta genes in certain tissues in humans $\gamma\delta$ t cells expressing the vg9vd2 encoded tcr account for anywhere between 50 and 95 of peripheral blood $\gamma\delta$ t cells whereas cells expressing non vd2 genes dominate in mucosal tissues in mice there is an ordered appearance of $\gamma\delta$ t cell waves during embryonic development resulting in preferential localization of $\gamma\delta$ t cells expressing distinct vgamma vdelta genes in the skin the reproductive organs or gut epithelia the major function of $\gamma\delta$ t cells resides in local immunosurveillance and immune defense against infection and malignancy this is supported by the identification of ligands that are selectively recognized by the $\gamma\delta$ tcr as an example human vgamma9 vdelta2 t cells recognize phosphorylated metabolites phosphoantigens that are secreted by many pathogens but can also be overproduced by tumor cells providing a basis for a role of these $\gamma\delta$ t cells in both anti infective and anti tumor immunity similarly the recognition of endothelial protein c receptor by human non vdelta2 $\gamma\delta$ t cells has recently been identified to provide a link for the role for such $\gamma\delta$ t cells in immunity against epithelial tumor cells and

cytomegalovirus infected endothelial cells in addition to classical functions such as cytokine production and cytotoxicity recent studies suggest that subsets of $\gamma\delta$ t cells can exert additional functions such as regulatory activity and quite surprisingly professional antigen presenting capacity it is currently not well known how this tremendous extent of functional plasticity is regulated and what is the extent of $\gamma\delta$ tcr ligand diversity due to their non mhc restricted recognition of unusual stress associated ligands $\gamma\delta$ t cells have raised great interest as to their potential translational application in cell based immunotherapy topics of this research focus include molecular insights into the activation and differentiation requirements of $\gamma\delta$ t cells role of pyrophosphates and butyrophilin molecules for the activation of human $\gamma\delta$ t cells role of $\gamma\delta$ t cells in tumor immunity and in other infectious and non infectious diseases and many others we are most grateful to all colleagues who agreed to write a manuscript thanks to their contributions this e book presents an up to date overview on many facets of the still exciting $\gamma\delta$ t cells dieter kabelitz julie déchanet merville
