Davidson's 100 clinical cases was awarded first prize in medicine in the 2009 British Medical Association Medical Book Awards. This book reflects the real world in which doctors practise medicine. The selection of clinical problems guides the reader step by step through the correct path in the maze between the presenting complaint of a patient and the final diagnosis. The text emphasises the value of interpreting available clinical and investigative information in a logical way before considering a definitive diagnosis. The 100 cases are based on the presenting problems of Davidson's Principles and Practice of Medicine. The book provides an international outlook reflecting the differences in the practice of medicine in the developing world and in low resource settings and addresses the epidemiological, economic and other reasons for many of these important differences. The cases are written by a team of senior doctors from 12 countries with considerable teaching experience. The book now includes 100 cases all closely linked to the presenting problems. Sections of the latest 21st edition of Davidson's Principles and Practice of Medicine. In this expanded new edition there are many new cases including aluminium phosphide poisoning, occupational lung disease, tremor and drug interactions.

Clinical Cases and Pearls in Medicine is a comprehensive collection of 203 clinical cases and 101 pearls across ten major areas of medicine as well as miscellaneous sub-specialties. The book is divided into two sections: the first covering cases in a range of medical specialties from gastroenterology to the musculoskeletal system; cases are covered in detail for all major systems of the human body including the respiratory system, cardiovascular system, nervous system and endocrine system. Every aspect of each clinical case is covered in detail including history taking, causes, investigations and treatment, followed by a viva voce question section, making this book ideal for medical students. The second section lists 101 pearls in medicine with key information highlighted in tables and blue text boxes for ease of reference, covering an extensive range of clinical cases enhanced by over 250 colour images and illustrations and offering invaluable pearls to students, consultants and physicians. Clinical Cases and Pearls in Medicine is an essential

source of reference and revision for all medical professionals key points includes 203 clinical cases and 101 pearls in medicine covers all major systems of the human body and many medical specialities over 250 images and illustrations

100 cases in clinical medicine presents 100 scenarios commonly seen by medical students and junior doctors in the emergency or outpatient department on the ward or in the community setting each case begins with a succinct summary of the patient's history examination and initial investigation the text includes photographs where relevant and questions on the diagnosis and management of each case the answers provide a detailed discussion on each topic with further illustration where appropriate most of the cases included are common problems but the book also includes more unusual cases to illustrate specific points and to emphasise that rare things do present occasionally and to prepare the student or trainee for these the cases are arranged within clinical systems and specialties though of course there may be significant overlap between these since symptoms such as breathlessness and pain may relate to many different clinical problems in various systems key features succinct case studies presented in an easy to read format listing patient history examination and investigations questions at the end of each case prompt readers to consider their options for diagnosis investigation and management answer pages then guide readers through the clinician's sequence of thoughts and actions illustrations information boxes and key points summaries reinforce learning ideal during exam revision a broad range of common conditions is covered from chest pain to weight gain together with more unusual presentations making speedy and appropriate clinical decisions and choosing the best course of action to take as a result are the most important and challenging parts of training to be a doctor these true to life cases will teach students and junior doctors to recognise important clinical symptoms and signs and to develop the diagnostic and management skills needed for the cases they will encounter on the job
