**FAQs**

1. My child is struggling with subtraction. What can I do?  
Start with concrete manipulatives like counters. Visually demonstrate the process of subtracting taking away objects to represent the subtraction equation. Gradually move towards abstract representations. Focus on place value understanding and breaking down larger subtraction problems into smaller manageable steps. Use online resources and games to make practice fun and engaging.
2. Where can I find answers to the problems in the EnVision Math workbook?  
The teacher's edition typically contains answer keys. However, focusing on the process of problem-solving rather than just getting the right answer is more beneficial for learning. If you're unsure about a solution, consult the teacher or utilize online resources.
3. How can I make math more engaging for my child?  
Connect math to real-world situations, incorporate games, use manipulatives, and praise effort and improvement. Celebrate small successes to build confidence. Try online math games and interactive activities that align with the concepts being taught.
4. My child is completing the workbook quickly but making many mistakes. What should I do?  
This suggests a lack of understanding rather than speed. Slow down the pace, focus on understanding the concepts before moving on, and ensure each step is mastered before introducing new material. Use manipulatives to visualize the problems and encourage your child to explain their thinking process.
5. How can I tell if my child is truly understanding the concepts and not just memorizing procedures?  
Ask your child to explain their reasoning behind their answers. Present them with slightly different problems or word problems that require applying the concepts in new contexts. If they can adapt and apply their understanding to novel situations, they have a stronger grasp of the concepts than if they can only solve problems they've seen before.
