Act I: Building Your Foundation Weeks (1-12)

This phase is crucial. Don't rush it. Focus on building a solid aerobic base and getting comfortable with the three disciplines: swimming, cycling, and running.

- Swimming:** 23 sessions/week. Start with shorter distances and focus on technique. Aim for 20-40 minutes per session. Use drills like pull sets and kick sets to improve efficiency. Example workout: 10 x 100m with 10 seconds rest between each.
- Cycling:** 23 sessions/week. Start with shorter, easier rides. Gradually increase distance and time. Include some hill work to build strength. Example workout: 1-hour easy ride followed by 4 x 1-minute hill repeats with 2-minute rest.
- Running:** 23 sessions/week. Start with shorter runs focusing on proper form. Include a mix of easy runs and interval training. Example workout: 30-minute easy run followed by 8 x 400m repeats with 200m jog recovery.

Strength Training: 12 sessions/week. Essential for injury prevention and overall performance. Focus on compound exercises like squats, deadlifts, and bench presses.

Act II: Strength Endurance Weeks (13-28)

This is where the real work begins. Gradually increase training volume and intensity. Incorporate longer rides, runs, and swims.

- Swimming:** 34 sessions/week. Include longer swims and openwater practice if possible. Focus on maintaining a consistent pace. Example workout: 2000m continuous swim with pacing sets.
- Cycling:** 34 sessions/week. Longer rides including some brick workouts (cycling followed by running). Increase hill work intensity and duration. Example workout: 3-hour ride with 6 x 5-minute hill repeats.
- Running:** 34 sessions/week. Longer runs including tempo runs and long runs. Continue interval training. Example workout: 1-hour tempo run at a comfortably hard pace.

Strength Training: 12 sessions/week. Maintain strength training to prevent injury and improve power.
