this book provides state of the art scientific and engineering research findings and developments in the area of mobile robotics and associated support technologies the book contains peer reviewed articles presented at the clawar 2008 conference robots are no longer confined to industrial manufacturing environments with a great deal of

interest being invested in the use of robots outside the factory environment the clwar conference series established as a high profile international event acts as a platform for the dissemination of research and development findings and supports such a trend to address the current interest in mobile robotics in meeting the needs of mankind in various sectors of the society these include personal care public health and services in the domestic public and industrial environments the editors of the book have extensive research experience and publications in the area of robotics specifically in mobile robotics and their experience is reflected in the careful editing of the contents in the book

if living in a town or city you are dependent on their water sewer natural gas electricity and their street maintenance but you pay a healthy price for these services what happens when one of these services or all of them are interrupted are you prepared for even a few days of interruption this little book may help and not cost a fortune to maintain a somewhat normal life when these outages occur that being said one must remember that the first fifty thousand or so years no one in the world had electric power and yet still seemed to flourish although i am not expert at anything i have built and given information to many about living off grid from my forty seven years of doing so the one thing i have learned is that money is the driving force for those that claim to be experts but be careful of these ads as most if not all have never lived off grid and only know what they have been schooled on that being said there are a few that are really good finding them is the problem so if you learn nothing else from this little book it will help to ask the right questions to help you find those few i have tried to be honest because if you decide to build and live this lifestyle you will soon discover what i have written is fact not fiction and only your lifestyle will determine how hard or easy it is to accomplish your goals although this is about living off grid it has some very good ideas and suggestions on how to build or buy on grid systems in case you lose your power that seems to occur about every storm especially in the east and southern states it has simple systems that you can install when you lose your electric power water or sewer and it will make these outages tolerable and may even save a life

in a book that is sure to become a classic internationally respected boatbuilder yacht manager and delivery skipper bill seifert shares his hard won solutions to a host of boat design construction and equipment issues and seamanship dilemmas unlike other books on the subject offshore sailing doesn t just tell readers what to do for safe and comfortable passage making it shows them how to do it with clear step by step instructions and nearly 200 detailed drawings and photographs
