this book is full of my personal successes and failures as a contractor and construction worker it hasn't always been easy and for the most part i made it harder than it needed to be but you don't need to why should you repeat the same mistakes i made years ago i would've paid five hundred dollars or more for the information inside this book when i started heck i probably would've paid 1000 for the information inside this book ten or fifteen years into my career when i first started i had problems dealing with my clients and other construction workers after that i had problems getting paid on time or getting paid period then i had to deal with the ultimate problem either too much or not enough work the challenges were often overwhelming and i can't tell you how many times i wanted to quit i had to make a change and those changes led me to learn more about construction business and psychology the more i learned the easier my job became and this motivated me to start learning about other things which eventually made my job even easier if you don't believe you need to read to succeed you're going to remain stuck where you are forever i was your average student in school who started a construction business at 25 years old with less than 1000 in the bank can you believe that it wasn't easy and i would have given practically anything to have the opportunity you have in front of you today to benefit from the years of my experience and for under fifty bucks come on this one is a no brainer education is the key to success my friend so let's get started on your journey towards a better life as a successful contractor money making machine and personal development junkie wishing you the best greg vanderberge
