hiv aids is a catastrophe globally but nowhere more so than in sub saharan africa which in 2008 accounted for 67 percent of cases worldwide and 91 percent of new infections the institute of medicine recommends that the united states and african nations move toward a strategy of shared responsibility such that these nations are empowered to take

ownership of their hiv aids problem and work to solve it

sub saharan africa is a region devastated by hiv aids the extent of the epidemic is only now becoming clear as increasing numbers of people with hiv are becoming ill in the absence of massively expanded prevention treatment and care efforts the aids death toll on the continent is set to escalate rapidly despite progress being achieved in localized settings the alarming statistics reflect the continuing failure of advanced countries to mount a response that matches the scale and severity of the african hiv aids crisis over and above the colossal personal suffering the dire social and economic consequences for fragile nation states are already being felt not only in health but in education industry agriculture transport human resources and economies in general countries already crippled by drought poverty debt forced migration and civil war must now contend with massive deterioration in child survival rates and life expectancy the erosion of the economic family base massive and insupportable demands on health and public services chronic labour shortages and volatile national security through a critical and detailed exploration of specific case studies this invaluable volume brings together an unparalleled array of international contributors to redefine the political and economic contours of this calamitous epidemic it examines the impact of the shortfalls in the global fund allocation the slow pace of administrative processing of aid and the weaknesses of institutional responses to the crisis from african countries and their partners in the global health community it is essential reading for all concerned with public health epidemiology hiv aids research globalization development africa and indeed our shared future features include unique assessments of hiv aids and its impact on democracy and governance in african states wide ranging regional and country studies by the foremost thinkers in their fields multi disciplinary contributions from areas including politics sociology public health and development studies compelling and convincing evidence thematic in approach innovative and culturally specific insights for long term planning care and support

this history of the african aids epidemic is a much needed accessibly written historical account of the most serious epidemiological catastrophe of modern times the african aids epidemic a history answers president thabo mbeki s provocative question as to why africa has suffered this terrible epidemic while mbeki attributed the causes to poverty and exploitation others have looked to distinctive sexual systems practiced in african cultures and communities john iliffe stresses historical sequence he argues that africa has had the worst epidemic because the disease was established in the general population before anyone knew the disease existed hiv evolved with extraordinary speed and complexity and because that evolution took place under the eyes of modern medical research scientists iliffe has been able to write a history of the virus itself that is probably unique among accounts of human epidemic diseases in giving the african experience a historical shape iliffe has written one of the most important books of our time the african experience of aids has taught the world much of what it knows about hiv aids and this fascinating book brings into focus many aspects of the epidemic in the longer context of massive demographic growth urbanization and social change in africa during the latter half of the twentieth century the african aids epidemic a history is a brilliant introduction to the many

aspects of the epidemic and the distinctive character of the virus

this report presents three hypothetical case studies for how the aids epidemic in africa could evolve over the next 20 years based on policy decisions taken today by african leaders and the rest of the world and considers the factors likely to drive the future responses of african countries and the international community the scenarios draw on the age old tradition of story telling rather than using data projections to explore the wider context of the aids epidemic reflecting the complexity of the subject matter

this comprehensive reference book addresses the unique challenges facing many african nations as poor infrastructure and economics continue to obstruct access to advanced treatments and aids care training it takes into account the context of settings with limited resources information on how to best utilize existing resources and prioritize scaling up of infrastructure is a critical aspect of this book for those working in hiv aids related fields in africa
