max weber s lecture science as a vocation is a classic of social thought in which central questions are posed about the nature of social and political thought and action the lecture has often taken to be a summation of weber s thought it can also be argued that together with the responses of its admirers and critics it provides a focus for discussion of the nature of

modernity and its political consequences and of the philosophical and political implications of the social or human sciences this volume provides a full clear revised translation of the lecture together with translations from the german of key contributions to the lively debate that followed its publication the book concludes with a substantial essay on the current significance of the lecture which discusses its relevance to the debates about the nature of science as a cultural phenomenon the disjunction between science and nature weber s conception of the disenchantment of the world the division of scientific labour and the fundamental nature and place of sociology

during the 1950s leading american scientists embarked on an unprecedented project to remake high school science education dissatisfaction with the soft school curriculum of the time advocated by the professional education establishment and concern over the growing technological sophistication of the soviet union led government officials to encourage a handful of elite research scientists fresh from their world war ii successes to revitalize the nations science curricula in scientists in the classroom john l rudolph argues that the cold war environment long neglected in the history of education literature is crucial to understanding both the reasons for the public acceptance of scientific authority in the field of education and the nature of the curriculum materials that were eventually produced drawing on a wealth of previously untapped resources from government and university archives rudolph focuses on the national science foundation supported curriculum projects initiated in 1956 what the historical record reveals according to rudolph is that these materials were designed not just to improve american science education but to advance the professional interest of the american scientific community in the postwar period as well
