exploring the unknown is a multi volume series containing a selection of key documents in the history of the u s civil space program volume v focusing on the exploration of space by robotic spacecraft that have significantly altered our perspectives on the cosmos prints 121 key documents on the history of space science planetary exploration of the solar system and space astrophysics edited for ease of use many of these documents are published here for the first time each is introduced by a headnote providing context bibliographical information and background information necessary to understanding the document this documentary history is an essential reference for anyone interested in the history of the u s civil space program and its development over time it will serve as a valuable source both for students and scholars additional volumes will appear later that trace space science and the programmatic developments in the history of the u s exploration of space

the very first book on space systems failures written from an engineering perspective focuses on the causes of the failures and discusses how the engineering knowledge base has been enhanced by the lessons learned discusses non fatal anomalies which do not affect the ultimate success of a mission but which are failures nevertheless describes engineering aspects of the spacecraft making this a valuable complementary reference work to conventional engineering texts

in 1989 i edited a somewhat similar group of essays published by westview under the title space policy reconsidered the preface to that volume began with this statement for some time space policy debate has been too constrained by pre existing assumptions and programs there is also a related need for a community of independent space policy analysts in order to inform those discussions the

aim of this book is to take a step toward meeting such needs that statement is repeated here because it is still valid and this book is intended to address the same unmet needs

this book tells the story of the mt stromlo observatory in canberra which began with w g duffield s idealism and vision in 1905 the observatory began life as a government department later becoming an optical munitions factory producing gun sights and telescopes during the second world war before changing its focus to astrophysics the new astronomy in the ensuing years programs were introduced to push the observatory in new directions at the international frontiers of astronomy the astronomers built new better and larger telescopes to unravel the secrets of the universe there were controversies exciting new discoveries and new explanations of phenomena that had been discovered the observatory and its researchers have contributed to determining how old the universe is participated in the largest survey of galaxies in the universe and helped to show us that the universal expansion is accelerating research that led to brian schmidt and his international team being awarded the 2011 nobel prize in physics these and other major discoveries are detailed in this fascinating book about one of the great observatories in the world
