now in paperback this extensive resource examines the doctrine of the church and offers guidance on mission pastoral care leadership and government in the local church numerous scripture references practical suggestions and discussion questions for every chapter make this work on ecclesiology perfect for both personal and group study

john goldingay takes the new testament as a portal into the complete canon of scripture without searching out an overarching unity he allows scripture s diversity and tensions to remain letting scripture speak to us in its own voice this landmark biblical theology is hermeneutically dexterous biblically expansive and nourishing to mind soul and proclamation

this monumental work is the first comprehensive biblical theology to appear in many years and is the culmination of brevard child s lifelong commitment to constructing a biblical theology that surmounts objections to the discipline raised over the past generation childs rejects any approaches that overstress either the continuity or discontinuity between the old and new testaments he refuses to follow the common pattern in christian thought of identifying biblical theology with the new testament s interest in the old rather childs maps out an approach that reflects on the whole christian bible with its two very different voices each of which retains continuing integrity and is heard on its own terms

this book teaches students how to make sense of the christian bible as a unity in the context of the story of jesus

one of the thorniest problems in theological study is the relationship between biblical studies on the one hand and constructive theology on the other theologians know that the bible is the core source document for theological construction and hence that they must be in conversation with the best in critical study of scripture for many biblical scholars the point of what they do is to help the biblical text speak to today s church and world and hence they would do well to be in conversation with contemporary theology yet too often the two groups fail to engage each other s work in significant and productive ways the purpose of the library of biblical theology and this introductory volume to it is to bring the worlds of biblical scholarship and constructive theology together it will do so by reviving biblical theology as a discipline that describes the faith of the biblical periods on the one hand and on the other hand

articulates normative understandings of modern faith and practice in this volume the authors begin by providing an overview of the history and possible future of biblical theology they introduce biblical theology as a fundamentally contrastive discipline one that is neither dogmatic theology seeking to explain the official teachings of a particular christian tradition nor is it a purely historical approach to scripture eschewing questions of the bible s contemporary message and meaning rather biblical theology takes seriously both the need to understand the message of scripture in its particular historical context and the need to address that message to questions that confront contemporary human life

this book demonstrates a number of approaches made by biblical scholars to find a theology of the christian scripture it then considers attempts to bridge the gap between exegesis and dogmatics by appeal to the discipline of fundamental theology and the doctrine of revelation it finds that for all the interesting questions raised one is forced back to the bible from where one must form the themes and concepts which have been developed by theologians through the ages and which with help from biblical historical critics can be made to refresh theology and serve the church this is done by examining the role of faith in the two testaments and by considering how the bible s understanding of that which receives revelation is itself useful for the total enterprise of theology

providing a model of how to do biblical theology this book also explores important emerging trends over the last five years including reception history as a means to grasping the theology of the bible theological interpretation as a new form of lectio divina meditative reading the place of jewish interpretation in forming a biblical theology and the ever present problem of losing old testament theology in new testament theology the second half of the book discusses the theme of providence as found in both testaments with insights gained from the history of biblical interpretation and from major attempts at working out a theology of providence elliott focuses on providence as it has been perceived rather than the themes of god s

goodness and powerfulness in themselves

this book is descended from the cadbury lectures delivered in the university of birmingham as long ago as 1968 my early volume old and new in interpretation 1966 remains the basis of the vision now presented the work in its present form is written as a sort of textbook though the book has been expanded to contain much more material than one could cover in a single course of the normal kind the work is a discussion of the whole idea of biblical theology its possibilities and its prospects it is neither a survey nor a history though it includes some elements of both of these if there is any one theme that runs through this work it is the contested character of biblical theology as it has been in this century preface

understanding biblical theology clarifies the catch all term biblical theology a movement that tries to remove the often held dichotomy between biblical studies for the church and as an academic pursuit this book examines the five major schools of thought regarding biblical theology and handles each in turn defining and giving a brief developmental history for each one and exploring each method through the lens of one contemporary scholar who champions it using a spectrum between history and theology each of five types of biblical theology are identified as either more theological or more historical in concern and practice biblical theology as historical description james barr biblical theology as history of redemption d a carson biblical theology as worldview story n t wright biblical theology as canonical approach brevard childs biblical theology as theological construction francis watson a conclusion suggests how any student of the bible can learn from these approaches

first published in 1947 this book discusses the developments in christian theology during the previous quarter century

excerpt from biblical theology of the old testament biblical theology is one of the more recent branches of theology our older theologians did not distinguish between dogmatic and biblical theology during the whole development of church doctrine down

to the middle of the present century no distinct line was drawn between the essential contents of revelation as they are laid down in the scriptures and the doctrinal formulas elaborated from them and still less were the successive stages of revelation and the types of doctrine which are presented in scripture recognized the bible was supposed to attest equally in the old and new testaments the truths which the church has accepted as doctrines the old testament being used in all its parts just like the new testament for proofs of doctrine but our modern theologians maintain that the old and new testament stand to each other in the relation of preparation and fulfilment that their unity must not be understood as identity that the old testament itself acknowledges that the manifestation of god's kingdom at that time was imperfect and temporary that still more distinctly does the new testament emphasize the difference from the old which subsists within the unity of the two testaments that the eternal counsel of salvation although announced by the prophets is nevertheless not completely revealed till after its actual realization that the tuition of the law reached its goal in the grace and truth of christ that the unity of the old and new testament must not be conceived of as an identity of doctrine but as a gradually advancing process of development of doctrine that in setting forth the doctrines of the bible systematically we must recognize the general development which revelation passes through in scripture itself and that the old atomistic system of scripture proof must be superseded by one which shows that the truths of salvation formulated in doctrinal statements are the result of the whole process through which revelation has passed about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
