excerpt from a history of the japanese people from the earliest times to the end of the meiji era it is trite to remark that if you wish to know really any people it is necessary to have a thorough knowledge of their history including their mythology legends and folk lore customs habits and traits of character which to a superficial observer of a different nationality or race may seem odd and strange sometimes even utterly subversive of ordinary ideas of morality but which can be explained and will appear quite reasonable when they are traced back to their origin the sudden rise of the japanese nation from an insignificant position to a foremost rank in the comity of nations has startled the world except in the case of very few who had studied us intimately we were a people but little raised above barbarism trying to imitate western civilisation without any capacity for really assimilating or adapting it at first it was supposed that we had somehow undergone a sudden transformation but it was gradually perceived that such could not be and was not the case and a crop of books on japan and the japanese deep and superficial serious and fantastic interesting and otherwise has been put forth for the benefit of those who were curious to know the reason of this strange phenomenon but among so many books there has not yet been so far as i know a history of japan although a study of its history was most essential for the proper understanding of many of the problems relating to the japanese people such as the relation of the imperial dynasty to the people the family system the position of buddhism the influence of the chinese philosophy etc a history of japan of moderate size has indeed long been a desideratum that it was not forthcoming was no doubt due to the want of a proper person to undertake such a work now just the right man has been found in the author of the present work who an englishman by birth is almost japanese in his understanding of and sympathy with the japanese people it would indeed be difficult to find any one better fitted for the task by no means an easy one of presenting the general features of japanese history to western readers in a compact and intelligible form and at the same time in general harmony with the japanese feeling the western public and japan are alike to be congratulated on the production of the present work i may say this without any fear of reproach for self praise for although my name is mentioned in the title page my share is very slight consisting merely in general advice and in a few suggestions on some special points about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our

in the earliest eras of historic japan there existed a hereditary corporation of raconteurs katari be who from generation to generation performed the function of reciting the exploits of the sovereigns and the deeds of heroes they accompanied themselves on musical instruments and naturally as time went by each set of raconteurs embellished the language of their predecessors adding supernatural elements and introducing details which belonged to the realm of romance rather than to that of ordinary history these katari be would seem to have been the sole repository of their country s annals until the sixth century of the christian era their repertoires of recitation included records of the great families as well as of the sovereigns and it is easy to conceive that the favour and patronage of these high personages were earned by ornamenting the traditions of their households and exalting their pedigrees but when the art of writing was introduced towards the close of the fourth century or at the beginning of the fifth and it was seen that in china then the centre of learning and civilization the art had been applied to the compilation of a national history as well as of other volumes possessing great ethical value the japanese conceived the ambition of similarly utilizing their new attainment for reasons which will be understood by and by the application of the ideographic script to the language of japan was a task of immense difficulty and long years must have passed before the attainment of any degree of proficiency
