the need for effective communication public outreach and education to increase support for policy collective action and behavior change is ever present and is perhaps most pressing in the context of anthropogenic climate change this book is the first to take a comprehensive look at communication and social change specifically targeted to climate change it is a unique collection of ideas examining the challenges associated with communicating climate change in order to facilitate societal response it offers well founded practical suggestions on how to communicate climate change and how to approach related social change more effectively the contributors of this book come from a diverse range of backgrounds from government and academia to non governmental and civic sectors of society the book is accessibly written and any specialized terminology is explained it will be of great interest to academic researchers and professionals in climate change environmental policy science communication psychology sociology and geography provided by publisher

this chapter focuses on climate science as it applies to what science can tell us about the changes we have observed to date and what caused them the goal is to answer the key questions that people ask about the science

the report also provides a comprehensive assessment of past and future sea level change in a dedicated chapter

small island developing states are often depicted as being among the most vulnerable of all places to the effects of climate change and

they are a cause célèbre of many involved in climate science politics and the media yet while small island developing states are much talked about the production of both scientific knowledge and policies to protect the rights of these nations and their people has been remarkably slow this book is the first to apply a critical approach to climate change science and policy processes in the south pacific region it shows how groups within politically and scientifically powerful countries appropriate the issue of island vulnerability in ways that do not do justice to the lives of island people it argues that the ways in which islands and their inhabitants are represented in climate science and politics seldom leads to meaningful responses to assist them to adapt to climate change throughout the authors focus on the hitherto largely ignored social impacts of climate change and demonstrate that adaptation and mitigation policies cannot be effective without understanding the social systems and values of island societies
