this volume initiates a new series of books on maritime or underwater archaeology and as the editor of the series i welcome its appearance with great excitement it is appropriate that the first book of the series is a collection of articles intended for graduate or undergraduate courses in underwater archaeology since the growth in academic opportunities for students is an important sign of the vitality of this subdiscipline the layman will enjoy the book as well academic and public interest in shipwrecks and other submerged archaeological sites is indicated by a number of factors every year there are 80 to 90 research papers presented at the society for historical archaeology s conference

on historical and underwater archaeology and the proceedings are published public interest is shown by extensive press coverage of shipwreck investigations one of the most important advances in recent years has been the passage of the abandoned shipwreck act of 1987 for the first time providing national level law concerning underwater archeological sites the legislation has withstood a number of legal challenges by commercial treasure salvors a very hopeful sign for the long term preservation of this nonrenewable type of cultural resource the underwater archaeological discoveries of 1995 were particularly noteworthy the texas historical commission discovered the belle one of la salle's ships and the css hunley was found by a joint project of south carolina and a private nonprofit organization called numa

although underwater archaeology has assumed its rightful place as an important subdiscipline in the field the published literature has not kept pace with the rapid increase in the number of both prehistoric and historic underwater sites the editors have assembled an internationally distinguished roster of contributors to fill this gap in addition to both geographical and topical approaches the chapters also focus on technology law public and private institutional roles and goals and the research and development of future technologies and public programs

our blue planet provides a comprehensive introduction to the field of maritime and underwater archaeology situating the field within the broader study of history and archaeology this book advocates that an understanding of how our ancestors interacted with rivers lakes and oceans is integral to comprehending the human past our blue planet covers the full breadth of maritime and underwater archaeology including formerly terrestrial sites drowned by rising sea levels coastal sites and a wide variety of wreck sites ranging across the globe and spanning from antiquity to world war ii beginning with a definition of the field and several chapters dedicated to the methods of finding recording and interpreting submerged sites our blue planet provides an entry point for all readers whether or not they are familiar with maritime and underwater archaeology or archaeology in general the book then shifts to a thematic approach with chapters exploring human interactions with the watery world both along the coasts and by ship these chapters discuss the relationships between culture technology and environment that allowed humans through time to spread across the globe because ships were the primary means for humans to interact with large bodies of water they are the focus of several chapters on the development of shipbuilding technology the lives of sailors and the uses of ships in exploration expansion and warfare the book ends with chapters on how and why the non renewable submerged archaeological record should be managed so that both current and future generations can learn from the achievements and failures of past societies as well as on how anyone can become involved in maritime and underwater archaeology throughout the reader benefits from the personal reflections of a number of leading figures in the field

underwater archaeology the nas guide to principles and practice provides a comprehensive summary of the archaeological process as applied in an underwater context long awaited second edition of what is popularly referred to as the nas handbook provides a practical guide to underwater archaeology how to get involved basic principles essential techniques project planning and execution publishing and presenting fully illustrated with over 100 drawings and new colour graphics new chapters on geophysics historical research photography and video monitoring and maintenance and conservation

the theory and practice of underwater archaeology includes nearly every archaeological discipline from prehistoric archaeology to the modern era

this is an open access title available under the terms of a cc by nc nd 4 0 license it is free to read download and share on the bar digital platform delivering the deep maritime archaeology for the 21st century originated from work presented at ikuwa 7 conference in helsinki and offers a comprehensive look at state of the art research being undertaken by maritime scholars a curated series of essays reviews change in the discipline over the past 50 years and highlights current trends the wide range of themes presented underscores the changing nature of maritime archaeology which has expanded from an initial focus on underwater archaeology and nautical technology to become a dynamic interdisciplinary field encompassing all tangible and intangible elements of culture related to human activities on in and around aquatic environments themes connected to theoretical frameworks especially those focusing on maritime cultural landscapes have increased in popularity a sign of growth in theoretical insights and maturing research this paves the way for a more nuanced understanding of past societies their behaviours technologies economies beliefs and interactions with watery environments

this open access peer reviewed volume was inspired by the unesco unitwin network for underwater archaeology international workshop held at flinders university adelaide australia in november 2016 content is based on but not limited to the work presented at the workshop which was dedicated to 3d recording and interpretation for maritime archaeology the volume consists of contributions from leading international experts as well as up and coming early career researchers from around the globe the content of the book includes recording and analysis of maritime archaeology through emerging technologies including both practical and theoretical contributions topics include photogrammetric recording laser scanning marine geophysical 3d survey techniques virtual reality 3d modelling and reconstruction data integration and geographic information systems the principal incentive for this publication is the ongoing rapid shift in the methodologies of maritime archaeology within recent years and a marked increase in the use of 3d and digital approaches this convergence of digital technologies such as underwater photography and photogrammetry 3d sonar 3d virtual reality and 3d printing has highlighted a pressing need for these new methodologies to be considered together both in terms of defining the state of the art and for consideration of future directions as

a scholarly publication the audience for the book includes students and researchers as well as professionals working in various aspects of archaeology heritage management education museums and public policy it will be of special interest to those working in the field of coastal cultural resource management and underwater archaeology but will also be of broader interest to anyone interested in archaeology and to those in other disciplines who are now engaging with 3d recording and visualization

the marine environment is almost ideal for the preservation of artefacts and until relatively recently it also provided complete protection from destruction by man however the aqualung has made most shallow underwater sites accessible leading to widespread plundering current deep sea bed technology now threatens deep water sites there is a need for immediate international action to preserve the man made environment alongside the natural one the enunciation of legal rules to protect the underwater cultural heritage is a complex issue involving a matrix of interests and laws both international and national

to what extent can underwater archaeology and underwater cultural heritage support a state s maritime claim many states have plausibly extended their maritime legislative and executive jurisdiction to the outer limit of the contiguous zone to better protect underwater cultural heritage however some states such as canada in the arctic china in the south china sea or russia in crimea are going further claiming sovereignty over disputed maritime areas or even the high seas maritime claims and underwater archaeology aimed at internationalists and archaeologists critically assesses these recent practices reviewing this search for buried sovereignty from a legal historical and ethical perspective

papers delivered at a conference held at the asian civilisations museum singapore 18 june 2011 t p verso
