this volume presents a selection of papers reflecting key theoretical issues in argumentation theory its six sections are devoted to specific themes including the analysis and evaluation of argumentation argument schemes and the contextual embedding of argumentation the section on general perspectives on argumentation discusses the trends of empiricalization contextualization and formalization offers descriptions of the analytical and evaluative tools of informal logic and highlights selected principles that argumentation theorists do and do not agree upon in turn the section on linguistic approaches to argumentation focuses on the problem of distinguishing between explanation and argument while also elaborating on the role of verbal indicators of argument schemes all essays included in this volume point out notable recent developments in the study of argumentation

this book brings together in one place david hitchcock s most significant published articles on reasoning and argument in seven new chapters he updates his thinking in the light of subsequent scholarship collectively the papers articulate a distinctive

position in the philosophy of argumentation among other things the author develops an account of material consequence that permits evaluation of inferences without problematic postulation of unstated premises updates his recursive definition of argument that accommodates chaining and embedding of arguments and allows any type of illocutionary act to be a conclusion advances a general theory of relevance provides comprehensive frameworks for evaluating inferences in reasoning by analogy means end reasoning and appeals to considerations or criteria argues that none of the forms of arguing ad hominem is a fallacy describes proven methods of teaching critical thinking effectively

since 1970 when charles hamblin issued a challenge for philosophers logicians and educators in general to begin work anew in fallacies a serious literature on fallacies has indeed developed part of this literature deals with the theory of what fallacies are another part of it contains rigorous analyses of particular fallacies however most is still not readily accessible to the researcher teacher or student of the field as a result the best work on fallacies is not finding its way into the classroom nor is it informing the educational and intellectual experiences available to most college and university students a major purpose of this book is to make the post hamblin work on fallacies available to a wider audience in a single convenient volume the editors have brought together for the first time the most important historical writings on fallacy theory from aristotle to john stuart mill and the most recent and most important theoretical and pedagogical developments in the field since hamblin s landmark 1970 book all but a few of the essays included are new contributions for this anthology and an extensive annotated bibliography is included for researchers and students of fallacies and fallacy theory

love s forgiveness combines a discussion of the nature and ethics of forgiveness with a discussion inspired by kierkegaard of the implications of considering interpersonal forgiveness as a work of love it introduces the reader to some key questions that have exercised recent philosophers of forgiveness discussing the relationship between forgiveness and an extended notion of resentment considering whether forgiveness should be conditional or unconditional showcasing a particular understanding of the latter and arguing that there are legitimate forms of third party forgiveness it then introduces the idea of forgiveness as a work of love through a discussion of

kierkegaard key new testament passages on forgiveness and some contemporary work on the philosophy of love drawing on both philosophy and the new testament it offers an understanding of forgiveness that incorporates both agapic love and a proper concern for justice john lippitt explores religious and secular uses of key metaphors for forgiveness and the idea of forgivingness as a character trait suggesting that seeking to correct for various cognitive biases is key to the development of such a virtue and connecting it to other putative virtues such as humility and hope lippitt draws on both kierkegaard s discourse literature and contemporary philosophical work on these latter characteristics before turning to a discussion of the nature of self forgiveness throughout the book the philosophical and theological literature is rooted in a discussion of various forgiveness narratives including helen prejean s dead man walking thordis elva and tom stranger s south of forgiveness and ian mcewan s atonement

against the logicians is what the author calls his eclectic collection of 15 essays spanning the last 15 years in topics ranging from affirmative action and capital punishment to the existence of santa claus and material taken from dear abby columns he breaks free from logician s traditional premises and his earlier belief that proficiency in formal or symbolic logic is what separates real philosophers from sophomores while trying not to alienate the very audience he seeks to address levi u of oregon eugene defends informal logic by critiquing the occupational hazards of critical thinking argumentation paradoxes and the unbearable vagueness of being annotation copyrighted by book news inc portland or

for the second edition this popular collection on contemporary ethical issues has been expanded to nine sections abortion and euthanasia are now given expanded coverage and there are new sections as well on assisted reproduction and commodification and on ethics and the use of violence the book is primarily composed of pieces by philosophers chosen both for their intrinsic value and for their accessibility to students but where relevant the collection also includes legal documents and non philosophical writings that help to set issues in context for canadian students in all ethical issues now includes sixty six selections thirty nine of which are new to this edition the editor has also provided extensive introductory

material and questions for discussion

this tribute to the breadth and influence of trudy govier s philosophical work begins with her early scholarship in argumentation theory paying special attention its pedagogical expression most people first encounter trudy govier s work and many people only encounter it through her textbooks especially a practical study of argument published in many editions in addition to the work on argumentation that has continued throughout her career much of govier s later work addresses social philosophy and the problems of trust and response to moral wrongs the introduction by catherine hundleby situates govier s research along the path of her unusual academic life while following the timeline of govier s research publication in this collection the authors build on her work and suggest certain new connections between her argumentation theory and social philosophy a practical study of argument first published in 1985 situates govier among a distinct segment of informal logicians whose concerns about teaching reasoning to post secondary students orient their research takuzo konishi argues moira kloster evaluates govier s progress in the challenge of providing critical thinking education to diverse and changing social contexts shifting gears to social philosophy but still addressing education laura elizabeth pinto explores the significance of govier s work on trust for explaining the problem of audit culture for teaching at the centre of this volume social philosophy receives an abstract meta ethical defense from linda radzik moving solidly into the domain of normative social philosophy alice maclachlan reconsiders govier s condemnation of revenge by viewing it as a form of moral address but she notes how revenge as an act of communication contrasts with argumentation in lacking the respect that govier maintains is intrinsic to argumentation maclachlan ultimately agrees that revenge is morally indefensible the practical challenges of addressing others in the aftermath of wrongdoing especially in public contexts can make it difficult to distinguish between victims and combatants or wrongdoers alistair little and wilhelm verwoerd explain and kathryn norlock argues that forgiveness is psychologically vexed too people may recognize transformation to be in principle possible for all people norlock argues and yet we may find the evidence regarding some particular evildoer sufficient to count that person as an exception finally govier responds to the various papers

this text provides students with a practical understanding of argument by means of enriched examples while maintaining philosophical soundness the fourth edition of this widely acclaimed text continues to provide an integration of formal and informal logic and fallacies and arguments in a clearly presented and theoretically sensible fashion

the authors aim has been to create an effective instrument to enhance classroom learning and to foster critical thinking the understanding that the reader arrives at based on the evidence that emerges from the clash of views encourages the reader to view history as an interpretive discipline not one of rote memorization as in previous editions the issues are arranged in chronological order and can be easily incorporated into any american history survey course each issue has an issue introduction which set the stage for the debate that follows in the pro and con sections pref
