accurate diagnosis includes concise disease pathophysiology reviews

featuring updated content throughout this new edition of clinical medicine lecture notes is a concise guide to both history taking and examination and to the essentials of clinical medicine on a system by system basis the text is divided into two sections with part one exploring communication and physical examination techniques supported by the core knowledge required for assessing and diagnosing diseases in the main systems of the body the second part of the text covers a range of common diseases although accounts of rare conditions are also given the level of information provided will equip junior clinicians with the necessary knowledge required to succeed in any clinical situation a concise approach that contains all that medical students and junior doctors need to know covering both the clinical approach and the essential background knowledge summary and evidence based medicine boxes to assist revision and learning includes osce exam summaries fully updated content throughout with full colour illustrations and photographs whether you need to develop your knowledge for clinical practice or refresh that knowledge in the run up to examinations clinical medicine lecture notes will help foster a systematic approach to the clinical situation for all medical students and junior doctors

as we move into the 21st century it is becoming increasingly difficult to offer appropriate introductory clinical experiences for medical students many schools offer clinical experiences in the first year of medical school when the learner has little background in the traditions and origins of the doctor patient interaction others begin this process in the second year after a professional language base has been established but concise educational materials are scarce that integrate the meaning of the privileged clinical encounter with the process and content of interviewing and examining patients in the tertiary hospitals where most medical schools are based the educators must provide an orientation to the clinical encounter an intensely personal experience in the midst of glittering technological marvels that easily distract both the novice physician and the wizened teacher understanding the context and historical basis for the privilege of interviewing and examining another person about intimate matters relating to health and disease is essential to this process considering these factors this textbook is written to assist medical educators and medical students involved in early clinical training as the demand for high tech medicine has accelerated so has the public concern over the loss of high touch or compassionate humane interactions with physicians physicians are perceived as more concerned with readouts from machines and fiberoptic views of the patient than with understanding and caring about the people we have labeled as patients

thoroughly revised for its fifth edition this concise textbook is ideal for medical students in internal medicine clinical clerkships this edition's content reflects current guidelines from the clerkship directors in internal medicine and the national board of medical examiners on topics necessary for this rotation the book is a collaboration between clinical faculty at the medical college of wisconsin and clerkship students who have reviewed all chapters for relevance to the clerkship experience a companion website will offer the fully searchable text 39 additional chapters 300 multiple choice questions with detailed explanations organized to mimic end of rotation exam settings ecg and cxr images with explanations narrated physical examination

videos and medicine rounds a quick review of questions frequently asked on rounds the online chapters include congenital heart diseases electrocardiography pulmonary function testing cystic fibrosis pulmonary hypertension adult respiratory distress syndrome ards mycoses thyroid cancer benign and malignant liver tumors nonalcoholic fatty liver disease pancreatic cancer leukopenia reactive leukocytosis eosinophilia blood transfusion heparin induced thrombocytopenia renal tubular acidosis acid based abnormalities somatization substance abuse and dependence general approach to dermatologic disorders dermatitis and eczema vitiligo herpes hsv and hzv common warts erysipelas scabies anaphylaxis drug allergy chronic pain red eye benign breast problems preconception care and issues in pregnancy functional decline in the elderly
