timely and controversial a bed for the night reveals how humanitarian organizations trying to bring relief in an ever more violent and dangerous world are often betrayed and misused and have increasingly lost sight of their purpose drawing on first hand reporting from hot war zones around the world bosnia rwanda congo kosovo sudan and most recently afghanistan david rieff shows us what humanitarian aid workers do in the field and the growing gap between their noble ambitions and their actual capabilities for alleviating suffering tracing the origins of major humanitarian organizations such as the international committee of the red cross doctors without borders and care he describes how many of them have moved from their founding principle of neutrality which gave them access to victims to encouraging the international community to take action to stop civil wars and ethnic cleansing rieff demonstrates how this advocacy has come at a high price by overreaching the humanitarian movement has allowed itself to be hijacked by the major powers sometimes to become a fig leaf for actions that major powers take in their own national interests as in afghanistan sometimes for their inaction as in bosnia and rwanda with the exception of cases of genocide where the moral imperative to act overrides all other

considerations Rieff contends that if humanitarian organisations are to continue doing what they do best alleviating suffering they must remain independent

the book examines the reasons behind accusations of dysfunctional humanitarian identities and the loss of space for impartial action through a combination of practical examples in case studies from the field with a theoretical and philosophical approach to questions of voluntary service community and identity it reconsiders the exceptional discourse that constructs these identities and drives humanitarian response in environments of complex emergency by recognizing both the strength and the limits of its social and political agency the study presents opportunities for the construction of a less exceptional space or niche within the humanitarian sector where the politics is around one of an ordinary humanitarian society instead of an ordered humanitarian system

humanitarianism has a narrative problem far too often aid to Africa is envisioned through a tale of western heroes saving African sufferers while labeling white savior narratives has become a familiar gesture it doesn't tell us much about the story as story humanitarian fictions aims to understand the workings of humanitarian literature as they engage with and critique narratives of Africa overlapping with but distinct from human rights humanitarianism centers on a relationship of assistance focusing less on rights than on needs less on legal frameworks than moral ones less on the problem than on the nonstate solution tracing the white savior narrative back to religious missionaries of the nineteenth century humanitarian fictions reveals the influence of religious thought on seemingly secular institutions and uncovers a spiritual collectivist streak in the discourse of humanity because the humanitarian model of care transcends the boundaries of the state and its networks touch much of the globe humanitarian fictions redraws the boundaries of literary classification based on a shared problem space rather than a shared national space the book maps a transnational vein of Anglophone literature about Africa that features missionaries humanitarians and their so-called beneficiaries putting humanitarian thought in conversation with postcolonial critique this book brings together African British and U.S. writers typically read within separate traditions Paustian shows how the novel with its profound sensitivity to narrative can enrich the critique of white saviorism while also imagining alternatives that give African agency its due

humanitarian intervention invariably rubs shoulders with politics albeit awkwardly and sometimes even with tragic results tensions between them take many forms ranging from different assessments of the extent or even the existence of a crisis to claims that humanitarian assistance is not saving innocent lives but sustaining politico military forces or to the conclusion that the constraints upon them compel aid agencies to withdraw from the area of operation completely whether to ensure the safety of their own staff or because they believe that their integrity is unacceptably compromised by staying development and humanitarianism addresses these and other dilemmas that aid agencies face in interpreting the principles of humanitarianism in contexts where they risk being manipulated by political agendas the contributors have extensive experience as frontline aid workers agency policy makers academics and researchers and professional consultants around the world like every book in the development
