free with main text this book is intended for people that have bought the main edition by krantz techniques of problem solving with assistance from krantz steven g

this volume is the third in an ongoing series of books that deal with the state of the art in timetabling research it contains a selection of the papers presented at the 3rd international conference on the practice and theory of automated timetabling patat 2000 held in constance germany on august 16 18th 2000 the conference once again brought together researchers practitioners and vendors from all over the world working on all aspects of computer aided timetable generation the main aim of the patat conference series is to serve as an international and inter disciplinary forum for new timetabling research results and directions the conference series particularly aims to foster mul disciplinary timetabling research our eld has always attracted scientists from a number of traditional domains including computer science and operational search and we believe that the cross fertilisation of ideas from di erent elds and disciplines is a very important factor in the future development of timetabling research the constance conference certainly met these aims as can be seen from the selection of papers in this volume there was a wide range of interesting approaches and ideas for a variety of timetabling application areas and there were delegates from many di

erent disciplines it is clear that while considerable progress is being made in many areas of timetabling research there are a number of important issues that researchers still have to face in a contribution to the previous patat conference george m

the present book includes a set of selected extended papers from the sixth international joint conference on computational intelligence ijcci 2014 held in rome italy from 22 to 24 october 2014 the conference was composed by three co located conferences the international conference on evolutionary computation theory and applications ecta the international conference on fuzzy computation theory and applications fcta and the international conference on neural computation theory and applications ncta recent progresses in scientific developments and applications in these three areas are reported in this book ijcci received 210 submissions from 51 countries in all continents after a double blind paper review performed by the program committee 15 were accepted as full papers and thus selected for oral presentation additional papers were accepted as short papers and posters a further selection was made after the conference based also on the assessment of presentation quality and audience interest so that this book includes the extended and revised versions of the very best papers of ijcci 2014 commitment to high quality standards is a major concern of ijcci that will be maintained in the next editions considering not only the stringent paper acceptance ratios but also the quality of the program committee keynote lectures participation level and logistics
