excerpt from psychology of education this book is a systematic treatise neither on psychology nor on education it endeavours to set forth the relation between them this relation must be found in the actual lives of individual children and it is to help people engaged in education to study those lives that i have written i have endeavoured to keep as free as possible from technicalities and throughout to deal with life as a developing whole though the treatment is psychological the selection of topics has been determined by educational considerations the end sought is a presentation of the general form in which efficiency of life develops through ever extending purposes the various human faculties are regarded as factors inter mingled in an indefinitely large variety of ways in every piece of life and are therefore not considered apart and in themselves similarly little or nothing is said of elements of experience which are merely constituent of fuller forms of life that a much more extensive and exact knowledge of facts must be attained before the course of mental development can be set forth with scientific precision and completeness is certain but for the purpose here in view this is not altogether a disadvantage about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at [forgottenbooks.com](http://forgottenbooks.com) this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
