this reader presents fresh insights on the rapidly expanding and changing crime related problems in the caribbean as well as provides information on new dimensions of crime and criminology that are occurring with increasing regularity a path breaking and comprehensive work crime delinquency and justice a caribbean reader has come at a time when all societies in the caribbean region are grappling with crime in all its forms and when the structure of the justice system on which all these societies are founded is being challenged to adjust to changes in society locally and internationally the work addresses both theoretical and practical issues indicated by the broad range of areas covered including theorizing a caribbean criminology juvenile delinquency and public policy domestic violence and the criminal justice system community policing police styles and use of force corrections crime statistics the jury system drug trafficking terrorism social upheaval and political violence and human trafficking much of the contributions are research and data driven and overall have policy development as their focus this makes the volume suitable for courses in criminology and criminal justice at both the undergraduate and graduate levels as well as for specialist courses in various aspects of policing and law enforcement

in developmental theories of crime and delinquency terence p thornberry and his contributors show that criminal behavior is not a static human attribute but ebbs and flows over the life course of the individual criminal behavior tends to follow a distinct psychological pattern it is relatively uncommon during childhood is initiated by most offenders during adolescence flourishes during late adolescence and early childhood and usually diminishes or disappears by the mid twenties this pattern is not characteristic of all people some never commit crimes and others become career criminals but it is a general description of the developmental pattern of criminal offenders this pattern has profound implications for theories of crime and delinquency not only does it explain initiation into maintenance of and desistance from involvement in crime it offers insight into why crime flourishes during adolescence traditional theories of crime and delinquency have often failed to distinguish among different phases of criminal careers they tend to ignore developmental changes that occur across a person s life course changes that coincide with and can explain the causes and patterns of criminal behavior this paperback edition of the seventh volume of the distinguished series advances in criminological theory moves us from static identifications of the criminal by presenting a broad

range of developmental explanations of crime each contributor articulates a developmental or life course perspective in explaining how people become involved in delinquency and crime each covers a wide range of theoretical territory and reveals how a developmental perspective enhances the explanatory power of traditional theories of crime and delinquency this volume is an invaluable tool for criminologists sociologists psychologists and other professionals seeking to teach how crime and violence can be understood in our culture

the handbook clearly points out that although the literature on crime prevention is voluminous the social conditions that invoke criminality are resistant to social change the articles repeatedly demand a critical evaluation of prevention theories and programs and call for accountability within the crime prevention profession the collection will serve as a valuable resource for policymakers and practitioners as well as for academics the volume includes an excellent directory of crime delinquency prevention organizations and a supplementary bibliography choice in recent years the idea of prevention as a means of controlling crime has gained unprecedented popularity advocates of crime prevention frequently see its proactive nature to be superior to the reactive stance of typical law enforcement yet major questions continue to arise about what prevention is how it can be carried out to whom it should be directed and where it can best be implemented elmer e johnson has drawn together a variety of perspectives in an effort to provide an integrated analysis of fundamental concepts relating to the preventive approach

the systematic application of behavioral psychology to crime and delinquency was begun only 20 years ago yet it has already contributed significantly to our practical knowledge about prevention and correction and to our general understanding of a pressing social problem in this handbook we review and evaluate what has been accomplished to date as well as what is currently at the leading edge of the field we do so in order to present a clear comprehensive and systematic view of the field and to promote and encourage still more effective action and social policy reform in the future the chapters in this text have been written by professionals who were among the original innovators in applying behavioral psychology to crime and delinquency and who continue to make critical contributions to the field's progress and by a new generation of energetic young professionals who are taking the field in important and innovative directions the contributors have attempted to review and evaluate their areas with critical dispassion to pro

vide thorough but not overly specialized discussion of their material and to draw implications for how research application and social policy might be improved in the future for our part as editors we have tried to foster integration across the chapters and to provide background and conceptual material of our own

this is a book about edwin h sutherland s theory of differential association i received my ph d from indiana university where i worked with sutherland and the volume is made up principally of my writings on differential association during the years 1952 1963 however the volume is neither a festschrift nor a book of reprints the original materials have in most cases been quite severely edited in order to give the volume coherence and in order to minimize repetition and redundancy for example portions of one journal article appear in chapters i iv and v parts of a chapter published in a recent book appear in chapters i ii and iii and chapter ix is composed of two inter related articles published eight years apart chapter i has not appeared elsewhere in its present form but most of it consists of snippets culled from several of my articles and books and woven together in new form the book is intended primarily for non american readers who on the whole are not as familiar with sutherland s theory or with other sociological and social psychological theories about delinquency crime and corrections as are americans yet at least a nodding acquaintance with sutherland s work is becoming increasingly necessary to an intelligent reading of the american literature in criminology

focussing on three areas of control theory the text first examines key assumptions and components of these theories key to the control theory perspective is the notion that crime is an inherently individual act and its explanation requires that we focus on the characteristics of individuals who commit crimes contributors discuss the notion of learning or socialization and the effects that families peers and the criminal justice system have on self control secondly it applies control theory to areas typically assumed to be out of the domain of self control theory and social control theory such as gender differences in crime domestic violence and group crime lastly it approaches the explanation of crime cross nationally and at the macro level illustrating that a theory of crime does not require culture specific elements in order to be a valid cross cultural explanation

the journal has advanced research in criminology and criminal justice through articles research notes review essays and special issues the journal of

research in crime and delinquency continues to keep you up to date on contemporary issues and controversies within the criminal justice field devoted to original research in crime and delinquency new theory and the critical analysis of theories and concepts especially pertinent to research development in this field

theories of delinquency provides a comprehensive survey of major theoretical approaches to the understanding of delinquent behavior it includes discussions of individualistic and sociological theories as well as examinations of classical theory female delinquency and theoretical integration

book on criminological research studies and theories in the areas of crime delinquency and social process the emphasis in this book however is not exclusively on the problems of explaining what statistical distributions of crime and delinquency mean and how individuals become criminals and delinquents the reader should be aware that as one examines statistical distributions of delinquency and crime rates and offender characteristics one must pay close attention to variables that relate to the settings and circumstances under which the statistics were collected once social scientists simply analyzed the available statistical facts the datum for study is the process by which the statistical information is assembled not just the final assembly for example arrest statistics are often used as the basis of generalizations about the social class distribution of delinquency and crime but there is systematic underreporting of crimes of respectable segments of the society thus among the selections reprinted in this book are research studies descriptive accounts and essays devoted to the illegal activities of businessmen labor union officials physicians politicians policemen and middle class youngsters the theoretical framework of this book is designed to make these violations just as understandable as the criminal violations of persons in the lower socioeconomic class

this handbook is an up to date examination of advances in the fields of juvenile delinquency and juvenile justice that includes interdisciplinary perspectives from leading scholars and practitioners examines advances in the fields of juvenile delinquency and juvenile justice with interdisciplinary perspectives from leading scholars and practitioners provides a current state of both fields while also assessing where they have been and defining where they should go in years to come addresses developments in theory research and policy as well as cultural changes and legal shifts contains summaries of juvenile justice

trends from around the world including the us the netherlands brazil russia india south africa and china covers central issues in the scholarly literature such as social learning theories opportunity theories criminal processing labeling and deterrence gangs and crime community based sanctions and reentry victimization and fear of crime
