A Sample Research Proposal With Comments A Sample Research Proposal with Comments A Definitive Guide Crafting a compelling research proposal is a crucial skill for any aspiring researcher. It's essentially a roadmap outlining your research journey, convincing reviewers of its merit and feasibility. This article dissects a sample research proposal, providing detailed comments to illuminate the key components and best practices. We'll explore the theoretical underpinnings alongside practical applications, making the process clearer and more accessible.

1. The Sample Research Proposal: Investigating the Impact of Social Media on Adolescent Self Esteem

1.1 Sample Text: This research investigates the relationship between social media usage and self-esteem in adolescents aged 13-18. Recent studies suggest a correlation, but the causal mechanisms remain unclear. This study aims to explore this relationship, considering factors like social comparison, cyberbullying, and online validation.

Comments: This introduction clearly states the research topic and its significance. Notice the acknowledgment of existing research and the identification of a knowledge gap. Think of an introduction as the hook of your research; it needs to grab the reader's attention and clearly articulate the problem you're addressing. A strong introduction also briefly hints at the methodology.

2. Literature Review: Sample Text

Existing literature extensively covers the impact of social media on mental health. Studies by Smith (2020) and Jones (2022) highlight the negative correlation between excessive social media use and self-esteem. However, these studies largely focus on correlational data. This research will delve into potential mediating factors such as online social comparison and the influence of cyberbullying.

Comments: This section effectively summarizes relevant existing research. Note the use of specific citations to support claims. The literature review isn't just a summary; it's a critical analysis identifying gaps and justifying the need for the proposed research. Consider it a conversation with previous scholarship, building upon and extending existing knowledge.

3. Research Questions and Hypotheses: Sample Text

Research Question 1: What is the relationship between daily social media usage and self-esteem in adolescents?

Research Question 2: Does the type of social media platform used moderate this relationship?

Hypothesis 1: Increased daily social media usage is negatively correlated with self-esteem.

Hypothesis 2: Usage of image-focused platforms (Instagram, Snapchat) is associated with a stronger negative correlation than text-based platforms (Twitter, Reddit).

Comments: Clear, concise, and testable research questions and hypotheses are crucial. These statements guide the entire research process. The hypotheses are directly derived from the literature review and research questions, establishing a logical progression. Research questions should be broad enough to encompass various aspects of your topic while still being focused enough to be manageable.

4. Methodology: Sample Text

This study employs a quantitative approach using a survey design. Participants (N=300) will be recruited from local high schools. Data will be collected through an online questionnaire, including validated scales for self-esteem (Rosenberg Self-Esteem Scale) and social media usage. Statistical analyses (correlation, regression) will be used to test the hypotheses.

Comments: This section outlines the research design, participant recruitment, data collection, and analysis. It provides a clear overview of the methodology used in the study.
