adulthood is taken for granted it connotes the end of childhood the resolution to the storm and stress period of adolescence this conception is strongly entrenched in the sociology of youth and the sociology of the life course as well as in the policy arena at the same time adulthood itself remains unarticulated journey s end remains conceptually fixed and theoretically uncontested adulthood then is both central to the social imagination and neglected as an area of sociological investigation something that has been noted by sociologists over the last four decades going beyond the overwhelmingly psychological literature this book draws on original qualitative research and theories of social recognition and thus presents a first step towards filling an important gap in our understanding of the meaning of adulthood

coming of age in times of crisis is an anthropological study of the intersecting roles of gender and schooling in the lives of rural venezuelan youth as they make the transition to adulthood during times of national political and economic crisis strongly grounded in local detail while speaking to larger comparative issues and the crises that surround globalization the study enables us to see how gender

roles and social class are reproduced in a culture experiencing profound upheaval and to see how rural Venezuelans have managed to reproduce and change their culture in these circumstances this book is based on two and a half years of ethnographic field research hurtig conducted in the Andean region of Venezuela between 1991 and 1993 and again briefly in 1996

the various phases of life and their manifestations in theory and social reality constitute a well-established area of research in the fields of Western medieval studies and ancient history in this respect the Byzantine East has been widely neglected this volume will focus on the Byzantine experience of adolescence which may be defined as the biological transition from childhood to adulthood as well as the social and psychological experience of leaving the care of parents guardians and family groups and the gradual integration into adult society the contributions gathered therein treat seven subtopics that correspond to crucial questions in the current research on adolescence the legal status of adolescents the mechanisms of transition from childhood to adolescence the socialisation and gradual integration into adult society adolescents in Byzantine art psychological aspects of adolescence from medieval to modern times illnesses of adolescents adolescents in the Western medieval world the focus is on the middle and late Byzantine period where historical hagiographical legal and medical sources offer rich material for an investigation of these aspects the book contributes to a better understanding of all these questions and to show future trajectories for research
