the conflict and contact between muslims and christians in the middle ages is among the most important but least appreciated developments of the period from the seventh to the fourteenth century michael frassetto argues that the relationship between these two faiths during the middle ages was essential to the cultural and religious developments of christianity and islam even as christians and muslims often found themselves engaged in violent conflict frassetto traces the history of those conflicts and argues that these holy wars helped create the identity that defined the essential characteristics of christians and muslims the polemic works that often accompanied these holy wars was important frassetto contends because by defining the essential evil of the enemy christian authors were also defining their own beliefs and practices holy war was not the only defining element of the relationship between christians and muslims during the middle ages and frassetto explains that everyday contacts between christian and muslim leaders and scholars generated more peaceful relations and shaped the literary intellectual and religious culture that defined medieval and even modern christianity and islam

what did people really believe in the middle ages much of our sense of the medieval period has come down to us from the writings of the learned the abbots priors magnates scholastic theologians and others who between them and across christendom controlled the machinery of church and state for g r evans too much emphasis has been placed on a governing elite and too little on those the great mass of the semi literate and illiterate and the emergent middle classes who stood outside the innermost circles of ecclesiastical power privilege and education her book finally gives proper weight to the neglected literature of demotic religion the lives of saints writings by those including lay women who had mystical experiences and lively texts containing stories for popular edification ranging widely from the fall of rome to the ideas of the reformation

the author addresses vital topics like the appeal of monasticism the lure of the crusades the rise of the friars and the acute crisis of heresy as evans reveals medieval christianity was shaped above all by its promise of salvation or eternal perdition

the routledge history of medieval christianity explores the role of christianity in european society from the middle of the eleventh century until the dawning of the reformation arranged in four thematic sections and comprising 23 originally commissioned chapters plus introductory overviews to each part by the editor this book provides an authoritative survey of a vital element of medieval history comprehensive and cohesive the volume provides a holistic view of christianity in medieval europe examining not only the church itself but also its role in influence on and tensions with contemporary society chapters therefore range from examinations of structures theology and devotional practices within the church to topics such as gender violence and holy warfare the economy morality culture and many more besides demonstrating the pervasiveness and importance of the church and christianity in the medieval world despite the transition into an increasingly post christian age the historic role of christianity in the development of europe remains essential to the understanding of european history particularly in the medieval period this collection will be essential reading for students and scholars of medieval studies across a broad range of disciplines

while historians of christianity have generally acknowledged some degree of germanic influence in the development of early medieval christianity russell goes further arguing for a fundamental germanic reinterpretation of christianity this first full scale treatment of the subject follows a truly interdisciplinary approach applying to the early medieval period a sociohistorical method similar to that which has already proven fruitful in explicating the history of early christianity and late antiquity the encounter of the germanic peoples with christianity is studied from within the larger context of the encounter of a predominantly world accepting indo european folk religiosity with predominantly world rejecting religious movements while the first part of the book develops a general model of religious transformation for such encounters the second part applies this model to the germano christian scenario russell shows how a christian missionary policy of temporary accommodation inadvertently contributed to a reciprocal germanization of christianity

in gender and christianity in medieval europe six historians explore how medieval people professed christianity how they performed gender and how the two coincided many of the daily religious decisions people made were influenced by gender roles the authors contend women's pious donations for instance were limited by laws of inheritance and marriage customs male clerics behavior depended upon their understanding of masculinity as much as on the demands of liturgy the job of religious practitioner whether as a nun monk priest bishop or some less formal participant involved not only professing a set of religious ideals but also professing gender in both ideal and practical terms the authors also argue that medieval europeans chose how to be women or men or some complex combination of the two just as they decided whether and how to be religious in this sense religious institutions freed men and women from some of the gendered limits otherwise imposed by society whereas previous scholarship has tended to focus exclusively either on masculinity or on aristocratic women the authors define their topic to study gender in a fuller and more richly nuanced fashion likewise their essays strive for a generous definition of religious history which has too often been a history of its most visible participants and dominant discourses in stepping back from received assumptions about religion gender and history and by considering what the terms woman man and religious truly mean for historians the book ultimately enhances our understanding of the gendered implications of every pious thought and ritual gesture of medieval christians contributors dyan elliot is john evans professor of history at northwestern university ruth mazo karras is professor of history at the university of minnesota and the general editor of the middle ages series for the university of pennsylvania press jacqueline murray is dean of arts and professor of history at the university of guelph jane tibbetts schulenberg is professor of history at the university of wisconsin madison
