in the past few decades clinical science has emerged as a prominent model for training and practice in clinical psychology this model emphasizes evidence derived from high quality research and is consistent with the increasingly influential evidence based movement in medicine which is a vital step toward making psychotherapy more effective efficient and safe despite this trend much current psychological practice is not evidence based moreover there is a marked dearth of resources available to train students and assist practitioners with the challenging goal of translating science into practice case studies in clinical psychological science demonstrates in detail how the clinical science model can be applied to actual cases

edited by professors william o donohue and scott o lilienfeld this book s unique structure presents dialogues between leading clinical researchers regarding the treatment of a wide variety of psychological problems from depression and alzheimer s disease to panic disorder and chronic pain chapters describe what evidence based practice consists of for various clinical problems and are followed by commentary sections in which other leading clinical researchers analyze the case at hand pointing out additional assessment and treatment options and controversial issues the chapter authors then reply to the commentary in response sections by examining the application of scientifically based interventions to actual cases and modeling thoughtful and collegial discussion among prominent clinical researchers case studies in clinical psychological science will assist students practitioners and clinical researchers with the crucial task of applying research evidence to psychotherapy and bridging the gap between science and practice

what will this book teach you how to approach a data science problem from scratch learn to ask the right questions define business goals and determine the data needed feature thinking made practical understand what features to engineer for each use case and why designing the right ml solution learn which models to use how to evaluate them and how to interpret results end to end analytics frameworks go beyond ml with strong descriptive diagnostic and inferential techniques system design for data science learn how to productionize your ml work with pipelines feedback loops and model serving what s inside the book foundations sections 1 3 introduction to data science analytics and machine learning real world analogies and industry insights clear differentiation of when to use analytics vs ml retail ecommerce churn prediction demand forecasting recommendation systems customer segmentation price elasticity using a b testing finance fintech credit scoring fraud detection portfolio risk cltv prediction smart transaction routing supply chain operations inventory route optimization supplier reliability backorder forecasting anomaly detection in logistics marketing sales campaign uplift dynamic pricing sales forecasting attribution modeling sentiment analysis why is this book different this is the only book that connects business understanding to data and system design each use case includes business objective key questions data requirements assumptions analytical ml solutioning feature engineering insights modeling approaches business metrics evaluation production ready system design who is this book for whether you re a fresh graduate a data enthusiast looking to break into data science a working professional transitioning from bi analytics to ml or a product manager or consultant who needs a structured framework this book is designed for you it eliminates fluff and delivers exactly what interviewers and real world business challenges demand clarity structure and actionable solutions
