this book discusses the return of geopolitical ideas and doctrines to the post soviet space with special focus on the new phenomenon of digital geopolitics which is an overarching term for different political practices including dissemination of geopolitical ideas online using the internet by political figures and diplomats for legitimation and outreach activity and viral spread of geopolitical memes different chapters explore the new possibilities and threats associated with this digitalization of geopolitical knowledge and practice our authors consider new spatial sensibilities and new identities of global as well as local selves the emergence of which is facilitated by the internet they explore recent reconfigurations of the traditional imperial conundrum of center versus

periphery developing manuel castells argument that social activism in the digital era is organized around cultural values the essays discuss new geopolitical ideologies which aim to reinforce russia's spiritual sovereignty as a unique civilization while at the same time seeking to rebrand russia as a greater soft power by utilizing the russian speaking diaspora or employing traditionalist rhetoric great power imagery enemy making and visual mappings of russia's future territorial expansion are traditional means for the manipulation of imperial pleasures and geopolitical fears in the age of new media however this is being done with greater subtlety by mobilizing the grassroots contracting private information channels and de politicizing geopolitics given the political events of recent years it is logical that the ukrainian crisis should provide the thematic backdrop for most of the authors

the rise and spread of the internet has accelerated the global flows of money technology and information that are increasingly perceived as a challenge to the traditional regulatory powers of nation states and the effectiveness of their constitutions the acceleration of these flows poses new legal and political problems to their regulation and control as shown by recent conflicts between google and the european union eu this book investigates the transnational constitutional dimension of recent conflicts between google and the eu in the areas of competition taxation and human rights more than a simple case study it explores how the new conflicts originating from the worldwide expansion of the internet economy are being dealt with by the institutional mechanisms available at the european level the analysis of these conflicts exposes the tensions and contradictions between on the one hand legal and political systems that are limited by territory and on the other hand the inherently global functioning of the internet the eu's promising initiatives to extend the protection of privacy in cyberspace set the stage for a broader dialogue on constitutional problems related to the enforcement of fundamental rights and the legitimate exercise of power that are common to

different legal orders of world society nevertheless the different ways of dealing with the competition and fiscal aspects of the conflicts with google also indicate the same limits that are generally attributed to the very project of european integration showing that the constitutionalization of the economy tends to outpace the constitutionalization of politics providing a detailed account of the unfolding of these conflicts and their wider consequences to the future of the internet this book will appeal to scholars working in eu law international law and constitutional law as well as those in the fields of political science and sociology

avian influenza is a highly contagious viral disease characterized by intense circulation in the wild waterbird reservoirs with periodical introductions into the domestic poultry sector ai viruses have been the source of devastating economic losses in the poultry industry over the last three decades and have become a major veterinary and public health concern due to their zoonotic potential the most emblematic illustration of this impact has been the emergence of the hpai h5n1 virus in southern china in the mid 1990s followed by its continental spread across east and southeast asia and the unprecedented epidemics recorded in 2003 2004 more recently from 2014 to 2017 several subtypes of hpai including h5n1 h5n6 h5n8 emerged in east asia and spread intercontinentally stressing the crucial role of this geographical hotspot as a source of new hpai subtypes the international dimension and the difficulty to effectively control those epidemics highlight the need for a global approach to hpai surveillance and a comprehensive knowledge on epidemiology and patterns of the disease this research topic aims at contributing to fill this gap it includes ten papers which supplement the knowledge of the epidemiology of ai and offer new approaches on control strategies in various regions of the world
