this book constitutes the proceedings of the 14th international conference on mobile and contextual learning mlearn 2015 held in a cruise ship leaving from and arriving to venice italy in october 2015 the 22 revised full papers and 6 short papers presented were carefully reviewed and selected from 81 submissions the papers deal with the topics related to the theme of the conference the mobile learning voyage from small ripples to massive open waters the conference theme paid tribute to the developments that brought mobile learning from its infancy steps in the early 2000s to maturity in 2015 while simultaneously paving the way for the broad and open waters ahead with new developments and progress in mobile learning and emerging ambient technologies

in 2007 the monash kings college london international centre for the study of science and mathematics curriculum edited a book called the re emergence of values in science education this book reflects on how values have been considered since this original publication particularly in terms of socio cultural economic and political factors that have impacted broadly on science technology and society and more specifically on informal and formal science curricula hence the title of this book has been framed as values in science education the shifting sands as in the first book this collection focuses on values that are centrally associated with science and its teaching and not the more general notion of values such as cooperation or teamwork that are also important values in current curricula such values have indeed become more of a focus in science education this may be a response to the changing global context where technological changes have been rapid and accelerating in such complex and risky environments it is our guiding principles that become the important mainstays of our decisions and practices in terms of science education what is becoming clearer is that traditional content and traditional science and scientific methods are not enough for science and hence science education to meet such challenges while shifts in values in science education continue tensions remain in curriculum development and implementation as evidenced by the continued diversity of views about what and whose values matter most

over the course of the last half century the growth economies of southeast asia indonesia

malaysia the philippines singapore thailand and vietnam have transformed themselves into middle income countries this book looks at how the very success of these economies has bred new challenges novel problems and fresh tensions including the fact that particular individuals sectors and regions have been marginalised by these processes contributing to discussions of policy implications the book melds endogenous and exogenous approaches to thinking about development paths re frames asia s model s of growth and draws out the social environmental political and economic side effects that have arisen from growth an interesting analysis of the problems that come alongside development s achievements this book is an important contribution to southeast asian studies development studies and environmental studies
