power supply current monitoring to detect cmos ic defects during production testing quietly
laid down its roots in the mid 1970s both sandia labs and rca in the united states and philips
labs in the netherlands practiced this procedure on their cmos ics at that time this practice
stemmed simply from an intuitive sense that cmos ics showing abnormal quiescent power
supply current iddq contained defects later this intuition was supported by data and analysis in
the 1980s by levi racd malaiya and su suny binghamton soden and hawkins sandia labs and
the university of new mexico jacomino and co workers laboratoire d automatique de grenoble
and maly and co workers carnegie mellon university interest in iddq testing has advanced
beyond the data reported in the 1980s and is now focused on applications and evaluations
involving larger volumes of ics that improve quality beyond what can be achieved by previous
conventional means in the conventional style of testing one attempts to propagate the logic
states of the suspended nodes to primary outputs this is done for all or most nodes of the
circuit for sequential circuits in particular the complexity of finding suitable tests is very high in
comparison the iddq test does not observe the logic states but measures the integrated
current that leaks through all gates in other words it is like measuring a patient s temperature
to determine the state of health despite perceived advantages during the years that followed
its initial announcements skepticism about the practicality of iddq testing prevailed the idea
however provided a great opportunity to researchers new results on test generation fault
simulation design for testability built in self test and diagnosis for this style of testing have
since been reported after a decade of research we are definitely closer to practice

this book compiles and examines advanced technologies in the field of reliability and risk
analysis it presents comprehensive methodologies and up to date software along with
examples of practical case studies from industrial areas to provide a realistic and authentic
