a decade ago computer scientist douglas hofstadter coined the term innumeracy which aptly
described the widespread ailment of poor quantitative thinking in american society so in
what the numbers say derrick niederman and david boyum present clear and

comprehensible methods to help us process and calculate our way through the world of data smog that we live in avoiding abstruse formulations and equations niederman and boyum anchor their presentations in the real world by covering a particular quantitative idea in relation to a context like probability in the stock market or interest rate percentages and while this information is useful toward helping us to be more financially adept what the numbers say is not merely about money we learn why there were such dramatic polling swings in the 2000 u s presidential election and why the system of scoring for women s figure skating was so controversial in the 2002 winter olympics showing us that good quantitative thinking skills are not only practical but fun
