why do the people in some companies continually dazzle us with their brilliant

decisions while those in others make one blunder after another do they understand their businesses better are they just plain smarter or is it all a matter of luck the answer says j frank yates is none of the above the real key rarely recognized is how the leaders manage the company s decision processes the leaders decision management practices drawing on his thirty years of research and experience as well as scholarship from psychology economics statistics strategy medicine and other fields to explain the fundamental nature of business decision problems yates highlights the ten cardinal decision issues crucial to managing the decision making process and ultimately better company decisions he covers problems ranging from recognizing whether a decision is actually called for to assuring that a preferred course of action will be implemented he shows how solid decisions result when managers ensure that deciders resolve every cardinal issue effectively for every decision problem facing the company he also reveals how conversely chronically poor decisions are traceable to managers allowing or even creating conditions that encourage deciders to fall short in how they address at least one of those critical issues

decision making and effective management foundations for developing business the decision making process may seem to some to be a simple matter that can be resolved in a few minutes but the truth shows that this matter is fraught with difficulty and complications especially if this decision is related to the fate of organizations business institutions and companies decision making is not an abstract process but a process that includes many effects of related variables among the controls determinants and choices of alternatives in order to resolve matters we find that there is what is called the most appropriate alternative and there is the optimal alternative and each of them has a price and cost also the decision making process must consider the situation of the decision maker his accumulated experience and other supporting factors and also considers the interaction of the recipient of the decision and decision making process also should consider the effects of the external and internal environment of organizations and also the effects of the interfering environment between them we must differentiate between the concept of decision making and the concept of decision taking the decision making process is a process that passes through several stages starting with identifying the topic or problem and taking note of all the details then moving to the analysis stage followed by the evaluation stage for this topic or problem and then collecting information in order to decide by first proposing appropriate solutions and working on evaluating them so that in the end the best one can be chosen among them the decision taking process refers to the conclusion reached by the decision maker makers after completing the collection of information and ideas about the topic or problem under discussion and finding several alternatives and solutions as for the decision taking process it is the process in which the choice of the most appropriate

solution or the best out of a set of choices is in the form of a decision made by a person or persons allowed to do so today we need distinguished people who create events formulate sustainable strategies set goals that can be achieved and manage difficult situations with their advanced tools and all of this will only come by changing our view of things and going out of the crucible of indoctrination to the spaciousness of innovation

should i have this medical treatment or that one is this computer a better buy than that one should i invest in shares or keep my money under the bed we all face a perplexing array of decisions every day thoroughly revised and updated throughout the new edition of straight choices provides an integrative account of the psychology of decision making and shows how psychological research can help us understand our uncertain world straight choices emphasises the relationship between learning and decision making arguing that the best way to understand how and why decisions are made is in the context of the learning and knowledge acquisition which precedes them and the feedback which follows the mechanisms of learning and the structure of environments in which decisions are made are carefully examined to explore their impact on our choices the authors then consider whether we are all constrained to fall prey to cognitive biases or whether with sufficient exposure we can find optimal decision strategies and improve our decision making featuring three completely new chapters this edition also contains student friendly overviews and recommended readings in each chapter it will be of interest to students and researchers in cognitive psychology behavioral economics and the decision sciences as well as anyone interested in the nature of decision making
