despite their common roots international economics ie and international business ib have developed into two distinct fields of study economists have directed their efforts at formalizing the workings of international trade and investment at the macroeconomic level business scholars have relied more on data driven conceptual narratives than mathematical tools but the recent focus of ie literature on firm heterogeneity suggests that ie would benefit from ib analyses of the behavior and organization of the

internationalizing firm the contributions to this volume investigate ways that insights from ib can enrich ie research in firm heterogeneity the contributors discuss firm specific advantages in international trade and investment considering the firm as the unit of analysis and managerial inputs as a variable in market entry decisions analyze interactions between a firm and its external environment including local corporate philanthropy and institutional settings examine the boundaries of the firm and organizational choices such as the make or buy decision and investigate technology transfer and innovation offshoring discussing the role of subsidiaries inventor employment and other related topics although ie and ib look at international firms from different perspectives these contributions make it clear that there is a potential for a productive exchange of insights and information between the two disciplines

this ebook is a collection of articles from a frontiers research topic frontiers research topics are very popular trademarks of the frontiers journals series they are collections of at least ten articles all centered on a particular subject with their unique mix of varied contributions from original research to review articles frontiers research topics unify the most influential researchers the latest key findings and historical advances in a hot research area find out more on how to host your own frontiers research topic or contribute to one as an author by contacting the frontiers editorial office frontiersin.org about contact

rafael leal arcas expertly examines the interface of climate change mitigation and international trade law with a view to addressing the question how can we make best use of the international trading system experience to aim at a global climate change agreement the insightful book contributes to developing the architecture for a post 2012 global climate agreement and in doing so seeks and proposes new approaches to climate change mitigation by linking it to the international trade system the author suggests the adoption of a bottom up approach to climate change negotiations by using the evolution of multilateral trade agreements as a model for reaching a global climate treaty he discusses the innovative approach of inserting climate goals within regional trade agreements given their proliferation especially bilateral in the international trading system he explains the trade implications of climate change mitigation policies by analyzing a couple of areas where the international regimes for trade and climate change mitigation may potentially clash climate change and international trade will strongly appeal to undergraduate and graduate students of

international and european trade law international and european environmental law as well as social science academics ngos think tanks practitioners researchers and international organizations will also find plenty of valuable information in this timely resource
