the command companion of seamanship techniques is the latest work from the well respected marine author d j house it contains all the information needed for command posts at sea all aspects of shipboard management are discussed with special emphasis placed on health and safety guidelines on how to respond to accidents and emergencies at sea contains the most recent solas revisions and a discussion of marine law to keep you up to date with the latest rules and regulations in order to aid learning the book includes a number of worked examples in the text along with questions and answers at the end of chapters the author tells you how to respond to accidents and emergencies at sea in the event for example of cargo contamination collision loss of stability due to cargo shift and damage due to flooding fire plus loss of life crew in addition the solas revisions and a discussion of marine law is included to keep you up to date with all the latest rules and regulations in order to aid learning this book will include a number of worked examples in the text along with questions and answers at the end of chapters d j house is senior lecturer in nautical studies at the nautical college fleetwood his sea going experience includes general cargo reefer bulk cargo passenger and liner trades underwater operations and roll on roll off ferries he is a well known marine author and has written seamanship techniques volumes 1 and 2 combined and he has revised cargo work in the kemp young series

many works on naval history ascribe success to the special qualities of individual leaders nelson being the prime example this book in contrast moves away from

focusing on nelson and other leading individuals to explore more fully how naval leadership worked in the context of a large complex globally capable institution it puts forward important original scholarship around four main themes the place of the hero in naval leadership organisational friction in matters of command the role of management capability in the exercise of naval power and the evolution of management and technical training in the royal navy besides providing much new interesting material for naval and maritime historians the book also offers important insights for management and leadership specialists more generally back cover

designed to provide an understanding of the theory and practice of marine navigation this text deals with general and coastal navigation pilotage anchoring and mooring radar and blind pilotage navigational errors relative velocity and collision avoidance and surveying and bridge organization
