a vibrant history of acoustical technology and aural culture in early twentieth century america
in this history of aural culture in early twentieth century america emily thompson charts
dramatic transformations in what people heard and how they listened what they heard was a
new kind of sound that was the product of modern technology they listened as newly critical
consumers of aural commodities by examining the technologies that produced this sound as
well as the culture that enthusiastically consumed it thompson recovers a lost dimension of the
machine age and deepens our understanding of the experience of change that characterized
the era reverberation equations sound meters microphones and acoustical tiles were deployed
in places as varied as boston s symphony hall new york s office skyscrapers and the
soundstages of hollywood the control provided by these technologies however was applied in
ways that denied the particularity of place and the diverse spaces of modern america began to
sound alike as a universal new sound predominated although this sound clear direct efficient
and nonreverberant had little to say about the physical spaces in which it was produced it
speaks volumes about the culture that created it by listening to it thompson constructs a
compelling new account of the experience of modernity in america
