this edited volume examines the implications for international development actors of new kinds of terrorism taking place in civil conflicts the threat from terrorism and violent extremism has never been greater at least in the global south where the vast majority of violent extremist attacks take place some of the most violent extremist groups are also parties to civil conflicts in regions such as the middle east and the horn of africa but are these groups especially the violent islamists which constitute the greatest current threat qualitatively different from other conflict actors if they are what are the implications for development practitioners working in war zones and fragile or poverty afflicted countries this study aims to answer these questions through a combination of theoretical enquiry and the investigation of three case studies kenya nigeria and iraq syria it aims to illuminate the differences between violent islamists and other types of conflict actor to identify the challenges these groups pose to development practice and to propose a way forward for meeting these challenges

this significant study examines a wide range of sub national conflicts across asia showing how despite their significant differences they share the role of the media as interlocutor and explores how the media exercises this role

based on the results of the bertelsmann transformation index 2006 bti this study challenges widespread assumptions and stereotypes about the nature of political violence the book reminds us that religious extremism while on the rise accounts for only a small fraction of armed conflict in the world moreover western countries preoccupation with transnational terrorism is misleading as most political violence has been and remains local in its origin and its area of activity the results call for a more differentiated assessment of the threats posed by militants and extremists if political violence and terrorism are still predominantly homegrown the multitude of local causes such as socioeconomic grievances or state weakness should receive more attention in any comprehensive effort to foster stability political institutions will have to play the pivotal role

radicalisation extremism and social work practice is the first book to explore cultural identity acculturation and perceived discrimination of muslim youth across western countries in relation to social work as well as the radicalisation and extremist views and actions of a small number of muslim youth it draws on relevant theoretical frameworks and research to examine the different approaches taken in social work practice some

countries consider multi agency approaches particularly how public health practice can inform interventions and strategies others take a public health approach looking for risk factors and seeking protective factors to develop suitable interventions within the communities through public engagement and partnership as well as examining and discussing the above approaches this book critically examines government and community based approaches to radicalisation and extremism and strategies for combating these this volume will be a valuable resource for social work students including other disciplines such as psychology public health psychiatry sociology political science and community development it will also be of interest to policy makers practitioners and researchers

this book provides a unique insight into the ethical issues and dilemmas facing practitioners and researchers of terrorism and counterterrorism ethics play a central if largely unrecognised role in most if not all issues relevant to terrorism and political violence these are often most noticeable regarding counterterrorism controversies while often virtually absent from discussions about academic research practice at a minimum ethical issues as they relate to terrorism have rarely been explicitly addressed in a direct or comprehensive manner the chapters in this edited volume draws on the experience of both practitioners and researchers to explore how a regard to ethical issues might influence and determine research and practice in counter terrorism and in our understanding of terrorism ethics and terrorism recognizes that there are conflicting and often irreconcilable perspectives from which to view terrorism and terrorism research in calling for greater attention to these issues the goal is not to resolve problems but to explore and clarify the assumptions and dilemmas that underpin our understanding of the personal institutional and societal ethical boundaries and constraints around terrorism and responses to it this book will be of value to practitioners and researchers and to policy makers and the broader interested community the chapters in this book were originally published as a special issue of the journal terrorism and political violence

this work is both a theoretical and empirical analysis of the growing use of ideological control in business and administrative organizations the empirical studies reported in this volume were conducted in different types of organizations and in different countries poland the united states and sweden throughout this unique examination the author emphasizes the role of ideologies as vehicles for organizational change not as traditionally seen as instruments for maintaining the status quo

terrorism and low intensity conflicts are not new in south asia but the september 11 2001 terror attacks on the united states suddenly gave the events a new dimension from regional considerations terrorism acquired global

connotation and in this changed perspective south asian terrorism and low intensity conflicts needed to be explored afresh the geographical region covered by the book includes predominantly the member countries of saarc afghanistan and myanmar as also specific case studies including a few instances of terrorist activities from beyond the region the papers analyse the societal political and economic factors responsible for the rise and salience of terrorism the challenges posed by terrorism and low intensity conflict on peace stability and security of the nation states and people the international regional and national regime against terrorism and perpetrators of mass violence the motives ideologies strategies and activities of various non state armed groups in south asia and thereby contribute toward meaningful policy options in tackling terrorism and activities of armed groups

with a renewed emphasis on national and homeland security the united states is once again seeking to balance the needs of the state with both the rights of its citizens as well as those of other nations this book represents an interdisciplinary approach to the legal dilemmas borne out by the war on terror against the specific background of afghanistan iraq and this new kind of conflict it is a strong contribution to a broader debate visible since 9 11 which will remain in the public eye for the foreseeable future it addresses the overlap between religion ethics armed conflict and law within the context of the current conflict while many issues in areas such as intelligence reconciliation of civil liberties dealing with terrorist threats and the permissible bounds of interrogation treatment of prisoners and laws governing armed conflict have long standing precedents under domestic and international law this war has challenged even long standing legal interpretations the contributors to this volume explore those precedents and contemporary challenges to them now that traditional wars between nation states are no longer the rule the terrorist threat has gained credence popularly terrorism and its claimed breeding ground in failed states linked in practice to issues of intervention on the territory of states harboring such groups in military circles the idea of armed struggle between modern military forces and what were formerly called guerillas has now largely been replaced by asymmetric warfare and the concept of intelligence and preventive action interchangeably within u s borders and overseas opposing views contemplate that different and presumably lower legal standards may apply in internal armed conflicts such legal issues are visible under current circumstances of asymmetric warfare in conjunction with questions about prisoner status and detentions including the permissible bounds of interrogation versus torture following the abu ghraib prison scandal in iraq but also the treatment at the guantanamo bay facility of alleged al q aeda captives from afghanistan all of the contributors in this book explore the changing circumstances against which these contentious new legal issues now unfold the experts strike no consensus indeed one of the work s many strengths can be attributed to the fact that the many facets of the ongoing debate are represented herein

analyzes the long term impact of the fall of the taliban not only on afghanistan but also on the south and west asia regions

this volume contends that online and digital communication can no longer be relegated to a separate cyber space and should instead be considered in equal part using cyber ethnographic methods

based on the results of the bertelsmann transformation index 2006 bti this study challenges widespread assumptions and stereotypes about the nature of political violence it reminds us that religious extremism while on the rise accounts for only a small fracture of armed conflict in the world moreover western countries preoccupation with transnational terrorism is misleading as most political violence has been and remains local in its origin and its area of activity study results call for a factual and more differentiated assessment of the threats posed by militants and extremists if political violence and terrorism are still predominantly home grown the multitude of local causes such as socioeconomic grievances or state weakness should receive more attention in any comprehensive effort to foster stability political institutions will have to play the pivotal role this insightful analysis is linked directly to the broader results of the bti 2006 which highlight the major democratic deficiencies in 119 development and transformation countries it underlines the importance of supporting democratic institutions and good governance in international efforts to combat terrorism

with links to the global jihad the indigenous insurgency and terrorism in xinjiang challenges the security and stability of china this book examines the prevailing scholarship on ethnic and minority conflicts and argues that the root cause of the conflict in china especially in xinjiang is not only about religious extremism but also about the systematic violation of basic rights and insensitivity towards minority identities by the state as our analysis demonstrates the islamist terrorist threat to china is manifestly clear and not ambiguous however beijing needs to develop an appropriate counter terrorism posture that is transparent legitimate and fair and addresses the concerns of the international community

an in depth analysis of the ethnic conflict as a generic problem phenomenon besetting most plural societies and proceeds towards identifying the requirements of monitoring predictive inference and problem solving

english translation of the dutch language book entitled harmonie en conflict on sociological aspects of modern economies covers social theory economic theory social structures human relations etc

africa is characterised by widespread and deeply entrenched poverty armed conflict slow economic

development until recently and agricultural systems proven to failure during frequent and persistent drought with its tremendous natural resources and remarkable social and ecological diversity the continent reflects a close dependency of people on natural resources this paper illustrates that it is this dependency that will present africa with potentially severe adaptive problems in dealing with the twin effects of climate change and population growth in future years more than ever africa and its partners need to work together to turn deforestation around to save its green lungs to manage its cities and to grow food for its hungry millions
