the original stimulus which started kenneth spencer on a study of the agro myzid flies was an invitation which he accepted to translate from the german the monograph on leaf miners by professor e m hering from this developed nearly 20 years of collaboration until professor hering s death in 1967 dr spencer has himself described over 600 new species in the family many of which he collected and reared from known host plants during his extensive travels to all the five main continents largely as a result of his work the number of species known in britain has increased from 90 in 1945 to 313 today he is thus uniquely qualified to write this book about the hundred and fifty or so species which are regularly associated with cultivated plants much of the taxonomic detail provided here will be of value primarily to specialists but with the help of a microscope and the botanical host list chapter 2 and the numerous illustrations mostly prepared by ann spencer those in agri cultural institutes and elsewhere should now be able to identify the majority of species found attacking crops in any part of the world

zoological record is published annually in separate sections the first of these is comprehensive zoology followed by sections recording a year s literature relating to a phylum or class of the animal kingdom the final section contains the new genera and subgenera indexed in the volume each section of a volume lists the sections of that volume

the book is based on papers presented at a conference held in oxford in march 1993 under the bridge cost 88 programme developed by the commission of the european communities a wide range of fungi which are pathogens of a variety of crop and ornamental plants is covered and the book is aimed at postgraduate students and research workers in mycology and plant pathology including those involved in routine testing of plants for quarantine or other purposes

issues for 1945 1966 consist of papers and minutes 1967 1979 consist chiefly of minutes 1980 consist of papers and minutes
